

ANSON CHAN

Loan Growth Marketing Manager

+852 9298 1110 | ai@digitalanson.com | digitalanson.com | Hong Kong — available on-site

Traditional Chinese (native, writing-grade) · English (fluent, writing-grade) · Cantonese (native) · Mandarin (fluent)

PROFESSIONAL SUMMARY

Growth and lifecycle marketer with **8 years** running customer growth operations, CRM and full-funnel campaigns against revenue targets in Hong Kong and Southeast Asia.

I own the loop, not a channel: **acquisition** → **first purchase** → **repeat** → **retention** → **win-back**, measured on contribution rather than impressions. **HK\$3M+ cumulative ad spend at 3–10x ROAS**, peaking at **HK\$500K+/month** at Hong Kong's #1 baby e-commerce platform, where I also ran a **30,000-subscriber Klaviyo lifecycle programme** and built the GA4 and Meta dashboards senior stakeholders reported off.

I write my own copy in **Traditional Chinese and English**, run structured single-variable A/B tests so results stay attributable, and iterate from post-campaign analysis rather than instinct — **+200% conversion rate** on one account through exactly that discipline.

WHY THIS ROLE FITS, AND WHERE I'D BE LEARNING

What transfers directly. A lending lifecycle and an e-commerce lifecycle are the same machine with different nouns. New customer credit onboarding is activation. First disbursement is first purchase. Repeat borrowing is repurchase rate. Dormant reactivation is win-back. I have built and run every one of those stages against a P&L, including the unglamorous parts — segmentation that holds up, offer economics that do not quietly destroy margin, and reporting that survives being questioned.

What I bring that is harder to hire. Native writing-grade Traditional Chinese *and* English, so compliant copy does not have to route through a translator. Eight years of paid-media budget discipline, so a voucher or rate-discount campaign gets judged on cost per incremental funded customer rather than redemption volume. And an AI-assisted production system, in commercial use since 2022, that lets one person produce and test campaign variants at a volume that normally needs a team.

What I would be learning, stated plainly. I have not worked in consumer lending. Cash Loan and BNPL product mechanics, credit approval and drawdown funnels, and risk-control collaboration on customer tiering are all new to me, and I would expect to be useful on product economics within a quarter rather than on day one. I would rather say this now than have it surface in month two.

What I have already done about the regulatory half. I have read the current position rather than assumed it. Licensed money lenders sit under the **Money Lenders Ordinance** and the Registrar of Money Lenders, not the HKMA — so **Licensing Condition 9** is the operative constraint on every piece of marketing: name and licence number displayed, the prescribed risk warning in both written and audio form, nothing that exaggerates ease of approval or encourages borrowing without regard to circumstances. I also note that the **first-phase enhanced measures took effect on 1 August 2026** — the new debt-servicing-ratio caps on unsecured lending to lower-income borrowers, the prohibition on requesting loan referees, and the shift of the risk-warning wording to whatever the Companies Registry specifies. Those are not footnotes for a growth plan; the DSR caps narrow the addressable audience and the referee prohibition removes a common acquisition shortcut, which changes where acquisition spend should sit. Compliance in this category is a brief, not an obstacle — but it has to be read, not assumed, and I would rather arrive having read it.

CORE COMPETENCIES

Customer lifecycle & CRM — End-to-end lifecycle design (welcome, activation, engagement, repeat, retention, win-back) · Klaviyo automation at 30,000 subscribers · dormant reactivation · journey-stage content mapping · customer persona development

Growth & funnel — Full-funnel architecture from traffic entry to conversion to repeat loop · cold-audience acquisition and warm-audience monetisation · conversion rate optimisation · landing page messaging · offer and discount structuring

Performance analysis — ROAS, CAC, CTR, CVR, CPA, repeat purchase rate, contribution margin · structured single-variable A/B testing · post-campaign analysis and iteration · kill criteria and winner-scaling frameworks

Data & reporting — GA4 · UTM and pixel governance · attribution modelling · Meta Ads Manager · dashboard build for senior stakeholders and monthly reporting cadence

Campaign execution — Strategy through copywriting to performance evaluation, end to end · **Traditional Chinese and English copy** · multi-channel: paid social, search, email, organic · creative testing at 10+ variants per cycle

Cross-functional — Product, design, development, operations and merchandising · external creator and partner programmes at 200+ partners · briefing and quality control on third-party output

Channels & tools — Meta Ads · Google Ads (Search, Shopping, Performance Max) · TikTok · Klaviyo · GA4 · Shopify · Notion · Claude / ChatGPT / Gemini / Midjourney (daily production use since 2022)

SELECTED RESULTS

Ran a 30,000-subscriber lifecycle programme against repeat revenue

Baby Central — Hong Kong's #1 baby e-commerce platform. Owned the Klaviyo content-to-conversion system end to end: twice-weekly campaigns plus automated **welcome, abandoned cart, post-purchase and win-back flows**, segmented by purchase stage and category behaviour.

Structurally this is the role's lifecycle spine — onboarding, activation, ongoing engagement, repeat growth, retention and win-back — run on a real subscriber base with revenue attached.

Owned HK\$500K+/month at 3–7x ROAS, tied to GMV not impressions

Led performance across Meta and Google (Search, Shopping, Performance Max, retargeting) through a high-growth scaling phase across HK and SEA. Delivered **HK\$300K incremental GMV within five months** and **30% organic traffic growth** through integrated SEO and paid social. Built the GA4 and Meta Ads Manager dashboards that connected spend to revenue rather than engagement proxies, and reported them monthly to senior stakeholders.

+200% conversion rate through disciplined A/B testing

Built a production pipeline that raised output to **10+ campaign variants per testing cycle** while holding **single-variable discipline** — hook, then message, then format — so every result stayed attributable to one change. Result: **+200% conversion rate**, peak campaigns at 10x+ ROAS, testing cycle time cut roughly 50%.

The methodology is the transferable asset: I do not run five changes at once and then guess which one worked.

Rebuilt a failing account: ROAS 0.3x → 3x in 90 days

A fashion and lifestyle retailer with budget trapped in warm retargeting and a stale creative pool. I rebuilt the full funnel, moved **70% of spend into cold-audience acquisition**, and tested to isolate which messages — not which audiences — were failing. **3x ROAS in 90 days on a majority-acquisition split**, which is the harder version of that result: net-new customers, not harvesting demand that already existed.

HK\$3M+ across 20+ brands, adapting to each sales cycle

Managed cumulative spend across retail, lifestyle and F&B at consistent 3–7x ROAS, rebuilding funnel architecture, offer structure and messaging register per brand and per purchase cycle.

Built and ran a 200+ partner programme with quality control

Sourced, briefed and enforced standards across 200+ KOL and influencer partners in HK and SEA — in a trust-sensitive category where a careless claim is a liability. Directly relevant to any programme where third-party or channel messaging carries regulatory exposure.

Built an audience from zero in Traditional Chinese

@aieasyjob — my own Cantonese-language brand across YouTube, Instagram and Facebook, 58 films written, directed and cut solo. One Facebook Reel reached **76,000 organic views from a page with 77 followers**, no paid support; a second, built the same way, reached 11,000. Converted into B2B consulting engagements at HK\$13,800/month packages.

Relevance: I write Traditional Chinese that starts in Traditional Chinese, and I can prove it earns attention without a media budget behind it.

HOW I'D APPROACH THE FIRST 90 DAYS

Instrument the loop before spending against it. Before new campaign spend, I want the funnel visible end to end — traffic entry, credit application, approval, first drawdown, repeat borrowing — with a single agreed definition per stage and a dashboard that a product lead, a risk lead and a finance lead all read the same way. I have built this reporting layer before; disagreement about definitions is what quietly kills growth programmes.

Segment on behaviour, not demographics. Borrowing pattern, repayment performance and consumption scenario are far stronger signals than age bracket. The first analysis I would want is which segments repay well *and* borrow repeatedly, because that intersection is where acquisition spend and rate discounts are worth concentrating — and where they are not.

Judge offers on cost per incremental funded customer. A voucher or rate discount has to be measured against the customer it actually created, not the redemption count. That means holdout groups where feasible, and an honest read on whether a discount simply pulled forward someone who would have converted anyway. It also means pressure-testing the wording: a "0% instalment" or "interest-free" claim is only available where the borrower genuinely pays nothing above principal, so the offer design and the copy have to be settled together rather than in sequence.

Separate the two product stories. Cash Loan sells speed and flexibility under pressure; BNPL sells permission to spend without a penalty. Those are different emotional states and should not share creative, even when they share a customer. I would define distinct messaging pillars and test them independently.

Build the approval workflow before the campaign calendar. Every piece of copy has to clear Licensing Condition 9, and with the Companies Registry now able to revise the mandated risk-warning wording, that is a live dependency rather than a one-off template. What I would want in week one is a named reviewer, an agreed turnaround time, and a pre-approved claims library — so testing velocity is limited by ideas rather than by sign-off.

If the consumer book is pre-launch, sequence accordingly. A launch and a scale-up need different first moves: a launch needs the funnel instrumented, the claims library cleared, one segment chosen deliberately, and a small honest cohort read before spend is widened. I would rather establish which of those two situations this is in the first conversation than assume.

PROFESSIONAL EXPERIENCE

Founder & Growth Operator — @aieasyjob (YouTube · Instagram · Facebook)

2024 – Present | Hong Kong

- Built a Traditional Chinese / Cantonese content brand from zero as a solo operator — strategy, copy, production, distribution and analytics across three platforms, 58 films to date and eight in the last month.
- Produced a **76,000-view organic Facebook Reel from a 77-follower page**, zero paid support; a second at 11,000 confirmed the result was structural.
- Ran hypothesis-driven tests on messaging, format and opening structure against native retention data, compounding findings into a documented playbook.
- Built an AI production pipeline (Claude, ChatGPT, Gemini, Midjourney) with reusable templates and QC checklists — cutting production time ~60%.
- Converted organic audience into B2B consulting engagements at HK\$13,800/month packages.

Freelance Digital Marketing Consultant

Mar 2024 – Present | Hong Kong & Regional Clients

- Rebuilt full-funnel Meta strategy for a fashion and lifestyle retailer — **0.3x to 3x ROAS in 90 days** on a 70% cold-acquisition split.
- Delivered **+200% conversion rate** through structured single-variable A/B testing at 10+ variants per cycle; peak campaigns at 10x+ ROAS.
- Managed monthly Shopify DTC budgets of HK\$30K–200K per client at consistent 3–7x ROAS.
- Built Klaviyo lifecycle flows — welcome, abandoned cart, post-purchase — driving measurable repeat purchase revenue.
- Deployed segmented personas and three-stage funnel messaging (awareness / consideration / conversion) for a multi-regional brand, cutting testing cycles 50%.

B2C E-Commerce & Digital Marketing Manager

Baby Central Limited (Hong Kong's #1 baby e-commerce platform) / Bloom and Grow Limited

Jan 2022 – Feb 2024 | Hong Kong & SEA

- Owned **HK\$500K+/month** Meta and Google spend at consistent **3–7x ROAS** across HK and SEA markets during a high-growth scaling phase.
- Drove **HK\$300K incremental GMV within five months** through data-driven Shopify campaign targeting and offer structuring.
- Owned the **Klaviyo content-to-conversion system for 30,000 subscribers** — 2x weekly campaigns plus automated welcome, abandoned cart, post-purchase and win-back flows.

- Built and scaled a **200+ KOL and influencer partnership programme** across HK and SEA, including briefing standards and output quality control.
- Grew organic site traffic **30%** through integrated SEO and paid social.
- Built **GA4 and Meta Ads Manager dashboards** for monthly senior-stakeholder reporting.
- Introduced generative AI into the creative and campaign workflow in **2022** — cutting A/B testing cycles 50% and materially reducing production cost, roughly two years ahead of industry adoption.
- Worked cross-functionally with product, design, development, operations and merchandising to ship campaigns on commercial deadlines.

Freelance Digital Marketing Manager — 20+ Retail / Lifestyle / F&B Clients

Nov 2018 – Dec 2021 | Hong Kong

- Managed **HK\$3M+ cumulative ad spend** across 20+ clients at consistent 3–7x ROAS.
- Rebuilt funnel architecture, offer structure and messaging register per brand and per purchase cycle, sustaining simultaneous engagements with fast turnaround.

Product Marketing Executive — Mayborn Ltd (Tommee Tippee)

May 2018 – Nov 2018 | Hong Kong

- Grew social engagement **15%** through 30+ micro-influencer partnerships generating 3,000+ engagements.
- Contributed to a **5x increase** in organic traffic through integrated digital campaigns.

CERTIFICATIONS

- **Executive Certificate in Growth Hacking & Data-Informed Marketing — The University of Hong Kong (2019)**
- Advanced Course for Generative AI in Digital Marketing — YMCA College (Dec 2024)
- All-in-One Full-Stack Marketing, No-Code & AI Agent Course (2025 – Present)

EDUCATION

Bachelor of Arts, Travel and Tourism Management — Northumbria University, UK (2005)

Associate Degree, Leisure and Tourism Management — City University of Hong Kong (2004)

LANGUAGES

Traditional Chinese — native, writing-grade · **English** — fluent, writing-grade · Cantonese — native · Mandarin — fluent

AVAILABILITY & PACKAGE

Current: HK\$40,600 per month — self-employed consulting income. Gross, and excluding employer MPF contribution, paid annual leave and medical coverage, so not directly comparable to a permanent package.

Expected: HK\$50,000 – 55,000 per month base, excluding bonus. This reflects the Hong Kong market range for a growth and CRM manager role at this scope, plus the move from self-employed consulting into a permanent position. Flexible depending on how the role is levelled and the total package — happy to anchor to your budgeted band rather than guess.

Notice period: None. Currently freelance, so available immediately once terms are agreed.

Location: Hong Kong, available on-site.
