WHY I'M APPLYING FOR THIS ROLE

I want to say this plainly at the top, because on paper I look senior for this posting and I would rather you hear my reasoning than guess at it.

I have eight years in digital and performance marketing, most recently managing e-commerce growth budgets. For the past two years I have also run @aieasyjob, my own Cantonese-language AI education channel — 58 videos, 87,500+ YouTube views. Somewhere in that period the side project stopped being a side project. Explaining AI to people who did not ask for it turned out to be the work I actually want to do.

AI education is a category I want to be inside, not adjacent to. This role is hands-on across exactly the mix I want to be executing every day — content, social, campaigns, analytics, competitor research — at a company that has real distribution into Hong Kong schools. I am not looking for a title. I am looking to point what I already know at a subject I care about, and I am content to earn the scope rather than be handed it.

I understand the obvious concern with a candidate at my experience level, so: I am not treating this as a stopgap, and I am happy to talk openly about level, salary and expectations at the first conversation rather than leaving either of us guessing.

DIRECTLY RELEVANT TO THIS ROLE

Content Creation — I write and produce everything I publish: long-form video scripts, short-form Reels, carousel copy, newsletters, landing page copy and ad copy, in both Cantonese and English. Two years of sustained output on @aieasyjob — 58 films, eight of them in the last month, plus copywriting across 20+ client brands, each with a different voice.

Social Media Management — Full ownership of three platforms (YouTube, Instagram, Facebook) as a solo operator: scheduling, publishing, community replies, and weekly testing against native analytics. One Facebook Reel reached **76,000 organic views from a 77-follower page** — no paid support. I answer my own comments and DMs, which is where most of what I know about this audience came from.

Campaign Support — Planned, executed and tracked integrated campaigns across Meta, Google, email and organic for e-commerce clients, coordinating creative, landing pages and reporting to deadline.

Data & Analytics — Built GA4 and Meta Ads Manager dashboards; run UTM and pixel governance; monitor traffic, engagement and conversion and report monthly. I read performance down the funnel — hook rate → CTR → CVR → CPA — not just at the top.

Market Research — Run AI-assisted competitor and trend monitoring as a standing weekly process: competitor content teardowns, outlier detection, platform change tracking, comment mining. It feeds the next content cycle rather than sitting in a report.

Cross-Functional Collaboration — Worked day to day with design, development, operations and merchandising teams at Baby Central to ship campaigns on commercial deadlines.

Daily AI proficiency — Claude, ChatGPT, Gemini, Midjourney and Ideogram in daily production use, with reusable prompt templates and QC checklists. I started using generative AI in commercial work in **2022**, before it was standard, and I teach it publicly.

SELECTED RESULTS

- **76,000 organic views** on a single Facebook Reel from a 77-follower page — ~990x follower count, zero paid support. A second Reel reached 11,000 using the same structure.
- **87,500+ YouTube views across 58 videos** on @aieasyjob; 8 videos published in the trailing 30 days.
- **+200% conversion rate** for a client through systematic AI-assisted creative testing — 10+ variants per cycle under single-variable discipline.
- **ROAS from 0.3x to 3x in 90 days** for a fashion and lifestyle retailer, rebuilding the funnel around cold-audience prospecting.

- **HK\$300K incremental GMV in 5 months** and **30% organic traffic growth** at Baby Central through integrated SEO and paid social.
- **200+ KOL and influencer partnerships** built and managed across Hong Kong and Southeast Asia.
- **30,000-subscriber** Klaviyo lifecycle programme — welcome, abandoned cart, post-purchase and win-back flows.
