

ANSON CHAN

Growth Marketing — Meta Ads, SEO & Bringing Paid Media In-House

+852 9298 1110 | ai@digitalanson.com | digitalanson.com | Hong Kong — available on-site

English (fluent) · Cantonese (native) · Traditional Chinese (native, Hong Kong tone) · Mandarin (fluent)

THE LINE IN YOUR BRIEF I'M ANSWERING

Under *What Success Looks Like*, you wrote: **"Ensuring Mylo internally owns its accounts, data, and invaluable marketing learnings."**

That is the hardest thing on the list, and it is the one I want to talk about — because taking over someone else's ad account without breaking it is the single most repeated experience of my career. I have done it across **20+ brands** as a freelance consultant, where inheriting an existing account is not an occasional project but the normal way an engagement starts.

Most of what goes wrong in an in-housing is not strategy. It is admin access nobody transferred, a pixel that belongs to an agency Business Manager, a conversion history that gets orphaned when campaigns are rebuilt, and a year of test results that existed only in someone else's head and left with them. Those are avoidable, and avoiding them is a checklist, not a talent.

ON LEVEL AND MONEY — STATED PLAINLY, SO NEITHER OF US WASTES TIME

Your req says 1–3 years. I have eight, and I would rather put that on the table now than have it surface as an awkward question in round two.

I am not applying because I want to step down. I am applying because the scope you have written — *lead* end-to-end Meta planning, *develop and manage* a structured testing programme, *craft and execute* a comprehensive SEO strategy, own brand guardianship on compliant nutrition messaging, and migrate the function in-house — is work I have actually done, and I would rather do it at a brand where the category logic is one I understand than at a larger company where the mandate is narrower.

On money: I would be looking at **HK\$45,000–52,000 per month base**. I recognise that may sit above the band for a Specialist title, and if it does I would genuinely rather hear that early. What I would ask is that the conversation be about the scope rather than the label — and if the band is fixed, I would still want to understand how you are levelling the role before either of us rules it out.

I have no notice period to serve. Two weeks from agreed terms.

HOW I'D RUN THE IN-HOUSING — FIRST 60 DAYS

Week one is custody, not strategy. Before anything is optimised, everything needs to be owned: Meta Business Manager admin under Mylo's own account, the pixel and Conversions API under Mylo's asset list, the product catalogue, GA4 and Google Search Console property ownership, the Shopify admin, domain and DNS access, and every ad account and page role documented. An in-housing that skips this step usually discovers the gap months later, at the worst possible moment.

Then extract the learnings before they walk out the door. Whatever has already been tested has value, and it evaporates when a relationship ends. I would want the account's full history pulled and written down — which audiences, creatives, offers and landing pages have been run, what won, what failed, and what was never tried. It is the cheapest research available and almost nobody does it during a handover.

Do not rebuild the account in week one. Conversion history and learning-phase data are real assets. The usual mistake in an in-housing is a clean-slate restructure that resets everything and produces a performance dip the founder then attributes to the new hire. I would run what exists, read it properly for two to three weeks, and restructure deliberately with a documented reason for each change.

Establish the reporting rhythm before the first optimisation. You asked for clear weekly and monthly reporting that summarises results, extracts learnings, flags risks and recommends next steps. I would rather set that format up in week one so the baseline is agreed and every subsequent change can be attributed — I have built exactly this at Baby Central, where GA4 and Meta dashboards fed monthly senior-stakeholder reporting.

Then start testing, one variable at a time. Details below.

THE TESTING PROGRAMME

You asked for a rigorous, structured programme across audience segments, creative concepts, messaging angles, offers and landing pages — and, in your success criteria, for **documented** learnings. The documentation is the part that compounds; the tests are just the input.

How I structure it. A 70/30 split between proven spend and active tests. Single-variable sequencing — hook, then messaging angle, then format, then offer, then landing page — so every result is attributable to one change rather than to three at once. Winners get written into a playbook with the conditions attached, so next quarter starts from what is known instead of re-deriving it.

Reading results down the funnel, not at the top. Thumb-stop and hook rate → CTR → CVR → CPA → ROAS, and for a subscription-shaped business, repeat rate. Creative that wins attention and dies at checkout gets retired, not scaled — and the diagnosis lives at whichever step actually broke, which is the "data-driven diagnostics" you describe.

What this produced. +200% conversion rate for one client through exactly this discipline, running 10+ variants per cycle with AI-assisted production so testing volume did not require a bigger team. Peak campaigns at 10x+ ROAS; cycle time cut roughly 50%.

Kill criteria, agreed in advance. The main reason testing programmes stall is that nobody decided beforehand what "failed" looks like, so losing variants get defended. I set the threshold and the spend cap before the test runs.

SELECTED RESULTS

Took over a failing account and got it to 3x ROAS in 90 days

A fashion and lifestyle retailer running Meta at **0.3x ROAS**, with budget concentrated in warm retargeting and a stale creative pool. I inherited the account, diagnosed that the failure was in the messaging rather than the audiences, moved **70% of spend into cold-audience acquisition**, and rebuilt the creative pool around journey-stage messaging. **3x within 90 days on a majority-acquisition split** — the harder version of that result, because it proves net-new persuasion rather than harvesting demand that already existed.

This is the account-takeover pattern, with a number attached.

Owned HK\$500K+/month at 3–7x ROAS in a trust-gated category

Baby Central — Hong Kong's #1 baby e-commerce platform. Led performance across Meta and Google (Search, Shopping, Performance Max, retargeting) through a high-growth scaling phase, delivering **HK\$300K incremental GMV in five months** and **30% organic traffic growth** through integrated SEO and paid social. Built the GA4 and Meta dashboards that tied spend to revenue rather than engagement proxies.

Parents buying for a baby and owners buying for a dog behave the same way: they do not choose on price, they choose on whether they believe you. The creative and proof mechanics transfer directly — and so does the discipline of writing health-adjacent claims you can actually stand behind.

HK\$3M+ across 20+ brands — mostly inherited accounts

Cumulative managed spend at consistent 3–7x ROAS across retail, lifestyle and F&B. In almost every case I took over an existing account: auditing what was running, establishing what had already been tested, and restructuring without losing conversion history. Repeated exposure to exactly the migration this role opens with.

Built a 30,000-subscriber lifecycle programme

Owned the Klaviyo content-to-conversion system at Baby Central — twice-weekly campaigns plus automated welcome, abandoned cart, post-purchase and win-back flows. Relevant to a subscription or repeat-purchase nutrition business, where the second order matters more than the first.

Ran the whole funnel solo, including the content and the copy

@aieasyjob — my own Hong Kong brand across YouTube, Instagram and Facebook, 58 films written, produced and cut solo. One Facebook Reel reached **76,000 organic views from a page with 77 followers**, no paid support; a second, built the same way, reached 11,000. Copy written natively in Traditional Chinese for a Hong Kong audience, not translated.

Directly relevant to a startup where the growth hire will inevitably be asked to write and produce, not just to buy media.

AI-assisted production since 2022

Introduced generative AI into commercial creative production roughly two years before industry-wide adoption. Reusable prompt templates with conditional logic and enforced QC checklists, automated competitor and trend monitoring, automated asset generation. This is why 10+ test variants per cycle is realistic for one person rather than aspirational.

WHERE I'D BE LEARNING — NAMED, NOT HIDDEN

Technical SEO. My SEO experience is content-led and on-page: keyword research, product and category page optimisation, search-intent content, and the SEO/paid-social integration that produced 30% organic traffic growth at Baby Central. What I have **not** owned is deep technical SEO — crawl and index diagnostics, schema implementation, Core Web Vitals remediation, log-file analysis. For the high-intent content opportunities you named (fresh dog nutrition, home-cooked feeding, dog wellness) I would be productive immediately; on the technical layer I would be learning, and for anything structural I would want a developer rather than pretending otherwise.

Pet nutrition as a category. I have not marketed pet food. Ingredient and formulation literacy, the veterinary channel, and the specific claim boundaries around functional and microbiome messaging are all new to me. Given that brand guardianship over *accurate, responsible and compliant* nutrition messaging is in the brief, I would treat the claim boundaries as week-one reading rather than something to learn by making a mistake in market.

CORE COMPETENCIES

Paid social — Meta Ads end-to-end: account structure, prospecting and retargeting, budget allocation and pacing, creative testing, catalogue and Advantage+ campaigns · account audit, takeover and restructure · Conversions API and pixel governance

Search — Keyword research · on-page and product-page optimisation · search-intent content strategy · Google Search Console · SEO and paid-social integration · Google Ads (Search, Shopping, Performance Max)

Measurement & diagnostics — GA4 · UTM discipline · attribution · funnel diagnosis · ROAS, CAC, CTR, CVR, CPA, repeat rate · weekly and monthly reporting built for decisions rather than for archives

Testing — Structured single-variable programmes · 10+ variants per cycle · pre-agreed kill criteria · documented playbooks

Lifecycle & CRO — Klaviyo automation (30,000 subscribers) · landing page messaging · conversion journey optimisation

Content & copy — Traditional Chinese and English, native Hong Kong tone · ad copy, landing pages, blog, email, short-form video · brand voice enforcement at volume

Platforms — Meta Ads Manager · Google Ads · GA4 · Google Search Console · Shopify · Klaviyo · Notion · Claude / ChatGPT / Gemini / Midjourney (daily production use since 2022)

PROFESSIONAL EXPERIENCE

Founder & Growth Operator — @aieasyjob (YouTube · Instagram · Facebook)

2024 – Present | Hong Kong

- Built a Hong Kong content brand from zero, solo — strategy, copy, production, distribution and analytics. 58 films to date, eight in the last month.
- **76,000-view organic Facebook Reel from a 77-follower page**, zero paid support; second at 11,000 confirmed the result was structural.
- Ran hypothesis-driven tests on messaging, format and opening structure against native retention data, compounded into a documented playbook.
- Built an AI production pipeline cutting production time ~60%, enabling test volume without headcount.
- Converted organic audience into B2B consulting engagements at HK\$13,800/month packages.

Freelance Digital Marketing Consultant

Mar 2024 – Present | Hong Kong & Regional Clients

- **Inherited and turned around** a fashion and lifestyle retailer's Meta account: 0.3x → 3x ROAS in 90 days on a 70% cold-acquisition split.
- Delivered **+200% conversion rate** through structured single-variable testing at 10+ variants per cycle; peak campaigns 10x+ ROAS.
- Managed monthly Shopify DTC budgets of HK\$30K–200K per client at consistent 3–7x ROAS.
- Built Klaviyo lifecycle flows and segmented three-stage funnel messaging, cutting testing cycles 50%.
- Standard engagement pattern: audit an existing account, document what has been tested, restructure without losing conversion history.

B2C E-Commerce & Digital Marketing Manager

Baby Central Limited (Hong Kong's #1 baby e-commerce platform) / Bloom and Grow Limited

Jan 2022 – Feb 2024 | Hong Kong & SEA

- Owned **HK\$500K+/month** Meta and Google spend at consistent **3–7x ROAS** across HK and SEA.
- Drove **HK\$300K incremental GMV within five months**; grew organic traffic **30%** through integrated SEO and paid social.
- Owned the **Klaviyo programme for 30,000 subscribers** — welcome, abandoned cart, post-purchase, win-back.
- Built and scaled a **200+ KOL and influencer programme** across HK and SEA, with briefing standards and output quality control.
- Built **GA4 and Meta Ads Manager dashboards** for monthly senior-stakeholder reporting.
- **Introduced generative AI into the creative workflow in 2022** — A/B cycles cut 50%.
- Worked cross-functionally with product, design, development, operations and merchandising.

Freelance Digital Marketing Manager — 20+ Retail / Lifestyle / F&B Clients

Nov 2018 – Dec 2021 | Hong Kong

- Managed **HK\$3M+ cumulative ad spend** at consistent 3–7x ROAS, in most cases taking over and rebuilding existing accounts.

Product Marketing Executive — Mayborn Ltd (Tommee Tippee)

May 2018 – Nov 2018 | Hong Kong

- Grew social engagement **15%** via 30+ micro-influencer partnerships generating 3,000+ engagements; contributed to a **5x increase** in organic traffic.

CERTIFICATIONS & EDUCATION

Executive Certificate in Growth Hacking & Data-Informed Marketing — The University of Hong Kong (2019) · Advanced Course for Generative AI in Digital Marketing, YMCA College (Dec 2024) · All-in-One Full-Stack Marketing, No-Code & AI Agent Course (2025 – Present)

BA Travel and Tourism Management — Northumbria University, UK (2005) · Associate Degree, Leisure and Tourism Management — City University of Hong Kong (2004)

AVAILABILITY & PACKAGE

Current: HK\$40,600 per month — self-employed consulting income. Gross, and excluding employer MPF contribution, paid annual leave and medical coverage, so not directly comparable to a permanent package.

Expected: HK\$45,000 – 52,000 per month base, excluding bonus. This reflects the scope described in the brief — owning Meta end to end, building the testing programme, and migrating the function in-house — rather than the Specialist title. If your band is set lower, I would rather discuss how the role is levelled than have either of us guess.

Availability: 2 weeks from agreed terms.

Location: Hong Kong, available on-site.
