

ANSON CHAN

Senior Growth Manager — AI & Marketing Automation

+852 9298 1110 | ansonchanai@outlook.com | digitalanson.com | youtube.com/@aieasyjob | IG @aieasyjob

Expected salary: HK\$48,000 per month

PROFESSIONAL SUMMARY

Growth marketing leader who runs AI and automation as operating infrastructure, not as a pilot project. 8 years scaling consumer acquisition for high-growth digital and e-commerce businesses in Hong Kong and Southeast Asia, with hands-on accountability for **multi-million HKD annual media budgets** — HK\$500K+ per month at Hong Kong's #1 baby e-commerce platform at 3–7x ROAS.

Introduced generative AI into commercial marketing production in **2022** — roughly two years ahead of industry adoption — cutting A/B testing cycles 50% and production cost materially. Now builds **custom Claude skills and multi-step automation pipelines** covering scripting, creative briefs, competitor research, asset production and cross-platform repurposing, plus automated analytics and reporting workflows.

The efficiency gain is measurable, not theoretical: **10+ creative variants per testing cycle** instead of two, held inside single-variable discipline so attribution survives the throughput — delivering **+200% conversion rate** and cycle time cut ~50%. On owned channels the same pipeline let one person sustain weekly multi-platform output and produce a **76,000-view organic Facebook Reel from a 77-follower page (~990x follower count)** with zero paid spend.

Led a team of three (two designers, one marketing executive) plus agency partners. Trilingual: Cantonese (native), English (fluent), Mandarin (fluent). Hong Kong-based, available for hybrid.

AI & AUTOMATION STACK — DAILY OPERATIONAL USE

Layer	Tools	Function in the growth workflow
Reasoning & orchestration	Claude (primary, daily)	Custom skills, multi-step pipelines, creative briefs, competitor teardowns, structural editing
Copy & concept at volume	Claude, ChatGPT, Gemini	Ad copy and angle variants, persona-led messaging, landing page copy, subject-line testing
Asset production	Midjourney, Ideogram, Seedance 2.0	Brief-to-visual production, carousel assets, creative refresh at cadence
Research & monitoring	Perplexity, AI-assisted outlier detection	Competitor teardowns, trend and platform-change tracking feeding the next test cycle
Measurement & ops	GA4, Meta Ads Manager, Klaviyo, Notion	Performance reads, lifecycle automation, asset library governance

AUTOMATION SYSTEMS BUILT

Custom Claude skills and multi-step pipelines. Purpose-built workflows for recurring growth operations — competitor research, brief generation, copy variant production, cross-platform repurposing — chained rather than re-prompted each time, so the process runs consistently regardless of who triggers it.

Reusable template library with conditional logic. Templates carrying embedded QC checklists, so output quality does not depend on an operator remembering standards. Cut scripting and production time ~60% and enabled same-day concept-to-live.

AI variant production for structured testing. 10+ creative and copy variants per cycle across formats, generated under single-variable testing discipline so higher throughput increases learning rather than noise. Testing cycle time cut ~50%.

Automated asset generation pipeline. Carousel and multi-format asset production with image-matching logic and enforced design standards — removing the design bottleneck for volume creative without adding headcount.

Asset governance layer. Naming conventions, tagging and version control so a fast-growing library stays searchable and reusable as volume scales, rather than becoming an untraceable folder dump.

Research-to-test loop. AI-assisted competitor and platform monitoring feeding hypotheses directly into the next testing cycle, instead of accumulating in reports nobody acts on.

PERFORMANCE HIGHLIGHTS

Metric	Result
AI in commercial production since	2022 (~2 years ahead of industry)
Testing throughput	10+ variants per cycle; cycle time cut ~50%
Conversion rate uplift	+200% ; peak 10x+ ROAS
Production time saved	~60% on scripting and asset creation
Peak monthly media budget owned	HK\$500K+ at consistent 3–7x ROAS
Cumulative media budget managed	HK\$3M+ at 3–10x ROAS
Revenue attribution	HK\$300K incremental GMV in 5 months
Account turnaround	ROAS 0.3x → 3x in 90 days
Lifecycle automation	Klaviyo, 30,000 subscribers, 4 automated flows
Solo-operated proof point	76,000-view organic Reel from 77 followers
Team led	3 direct reports + agency partners

SIGNATURE CASE STUDIES

1. Early Generative AI Adoption in Commercial Marketing — 2022

Context. At Baby Central, creative testing throughput was the bottleneck on a HK\$500K+/month paid programme. Generative AI was not yet standard practice in Hong Kong marketing teams and there was no internal precedent to copy.

Action. Integrated ChatGPT and Ideogram directly into the production workflow for copy variants and visual assets — then rebuilt the testing process around the higher throughput this unlocked, rather than bolting AI onto an unchanged process. Established output standards so speed did not cost quality.

Result. **A/B testing cycles cut 50%** and production cost reduced materially, roughly two years before industry-wide adoption. The account sustained consistent **3–7x ROAS** on HK\$500K+/month throughout, and delivered HK\$300K incremental GMV in 5 months.

2. Testing Throughput Without Losing Attribution — +200% Conversion Rate

Context. Client creative testing was limited to a handful of variants per cycle. Slow, low-confidence learning meant long periods running unvalidated creative — and the obvious fix, more variants, normally destroys attribution.

Action. Built an AI-assisted variant production pipeline raising output to **10+ variants per cycle** across copy and visual, while enforcing **single-variable sequencing** — hook, then messaging, then format — so every result remained attributable at volume. Winners documented into a playbook with the structural reason they won.

Result. **+200% conversion rate** across Meta Ads and Instagram, peak campaigns at **10x+ ROAS**, testing cycle time cut ~50%. Learning velocity compounded across the account instead of resetting each cycle.

3. AI Efficiency Proven Under the Hardest Conditions

Context. Running a multi-platform content operation solo — no team, no media budget, no existing audience. If AI-driven workflows only produce volume rather than results, this is where it shows.

Action. Designed an end-to-end pipeline: custom Claude skills for scripting, briefs and competitor teardowns; Midjourney and Ideogram for visuals; automated carousel generation with image-matching logic and enforced design standards; reusable templates with QC checklists governing the whole chain.

Result. Sustained weekly output across YouTube, Instagram and Facebook as one person — **76,000-view organic Facebook Reel from a 77-follower page (~990x follower count, ~210x channel median)** with zero paid support, a second Reel at 11,000 views confirming it was structural, and **84,000+ YouTube views across 57 videos**. Scripting time cut ~60%.

4. Paid Acquisition Turnaround — ROAS 0.3x to 3x in 90 Days

Context. A fashion and lifestyle retailer was running Meta Ads at 0.3x ROAS, with budget concentrated in warm retargeting and a stale creative pool — harvesting existing demand at a loss.

Action. Diagnosed the failure as creative and funnel rather than audience, isolating it with single-variable tests. Reallocated **70% of budget to cold-audience prospecting**, rebuilt the creative pool around journey-stage messaging using AI-generated variants, and rebuilt landing page messaging to match ad promise.

Result. ROAS **0.3x to 3x within 90 days** on a majority-prospecting split — a harder result than a retargeting-led lift, because the gain came from net-new customers.

5. Lifecycle Automation — 30,000 Subscribers

Context. Acquisition was working but repeat purchase was under-exploited, leaving unit economics dependent on continuous paid spend.

Action. Owned the Klaviyo system end to end: 2x weekly campaigns plus four automated flows — welcome, abandoned cart, post-purchase, win-back — with segmentation and A/B testing, coordinated so acquisition and retention messaging told one continuous story.

Result. A working repeat-purchase engine driving measurable returning revenue and lifting the value of every acquired customer.

PROFESSIONAL EXPERIENCE

B2C E-Commerce & Digital Marketing Manager

Baby Central Limited (HK's #1 baby e-commerce platform) / Bloom and Grow Limited

Jan 2022 – Feb 2024 | Hong Kong & SEA

- Pioneered generative AI (ChatGPT, Ideogram) in commercial production workflows in **2022** — A/B testing cycles cut 50%, production cost materially reduced, ~2 years ahead of industry adoption.
- Owned channel performance and budget allocation for **HK\$500K+/month** (≈HK\$6M annually) across Meta and Google at consistent **3–7x ROAS** across HK and SEA.
- Drove **HK\$300K incremental GMV within 5 months** via data-driven Shopify campaign targeting.
- **Led a team of three — two designers and one marketing executive** — covering social media, EDM, website design and revamp, and offline event support; briefed and managed agency partners.
- Owned the Klaviyo automation system for **30,000 subscribers**: 2x weekly campaigns plus welcome, abandoned cart, post-purchase and win-back flows with segmentation and A/B testing.
- Delivered a full website design and revamp with the in-house design team, improving user flow and conversion path.
- Scaled a **200+ KOL programme** across HK and SEA as a measurable acquisition channel.
- Built GA4 and Meta Ads Manager dashboards for monthly senior-stakeholder reporting; grew organic traffic **30%**.

Founder & Growth Operator — @aieasyjob (YouTube · Instagram · Facebook)

2024 – Present | Hong Kong

- Designed and operate an end-to-end AI production pipeline enabling one person to sustain weekly multi-platform output — the working proof of the automation approach.
- Produced a **76,000-view organic Facebook Reel from a 77-follower base** (~990x follower count) plus a second Reel at 11,000 views, zero paid support.
- Built custom Claude skills and multi-step pipelines for recurring growth operations — research, briefs, copy production, cross-platform repurposing.
- Built an automated carousel generation system with image-matching logic and enforced design standards.
- **84,000+ YouTube views across 57 videos**; weekly hypothesis-driven testing against native analytics.
- Converted organic content into B2B consulting revenue at HK\$13,800/month.

Freelance Digital Marketing Consultant

Mar 2024 – Present | Hong Kong & Regional Clients

- Generated 10+ AI-produced creative variants per cycle on Meta Ads and Instagram — **+200% conversion rate**, peak ROAS 10x+.
- Rebuilt a fashion retailer's Meta strategy — **ROAS 0.3x to 3x in 90 days**, 70% cold-audience budget.
- Used Claude and ChatGPT to build personas and three-stage funnel messaging for a multi-regional hair care brand — testing cycles cut 50%.
- Managed monthly Shopify DTC budgets of HK\$30K–200K per client at consistent 3–7x ROAS.

Freelance Digital Marketing Manager — 20+ Retail / Lifestyle / F&B Clients

Nov 2018 – Dec 2021 | Hong Kong

- **HK\$3M+ cumulative ad spend** with repeatable frameworks at consistent 3–7x ROAS across diverse verticals.

Product Marketing Executive — Mayborn Ltd (Tommee Tippee)

May 2018 – Nov 2018 | Hong Kong

- Grew social engagement **15%** via 30+ micro-influencer partnerships (3,000+ engagements); contributed to **5x** organic traffic growth.

CORE COMPETENCIES

Paid acquisition & multi-channel budget allocation · ROAS / CPA accountability · Funnel architecture & conversion rate optimisation · A/B and multivariate experimentation · Lifecycle retention & segmentation (Klaviyo) · Marketing automation & workflow design · AI-accelerated production at scale · GA4 dashboards & stakeholder reporting · Team leadership & agency management · Cross-functional collaboration (design, development, operations, merchandising)

CERTIFICATIONS

- Advanced Course for Generative AI in Digital Marketing — YMCA College (Dec 2024)
- All-in-One Full-Stack Marketing, No-Code & AI Agent Course (Online, 2025 – Present)
- Executive Certificate in Growth Hacking & Data-Informed Marketing — HKU (2019)

EDUCATION

Bachelor of Arts, Travel and Tourism Management — Northumbria University, UK (2005)

Associate Degree, Leisure and Tourism Management — City University of Hong Kong (2004)

LANGUAGES

Cantonese (native) · English (fluent) · Mandarin (fluent)
