AI Advisory — Adoption & Enablement

+852 9298 1110 | ai@digitalanson.com | digitalanson.com | Hong Kong — available on-site

English (fluent, writing-grade) · Traditional Chinese (native, writing-grade) · Cantonese (native) · Mandarin (fluent)

WHAT I AM APPLYING FOR, AND WHAT I AM NOT

Your brief asks for a Director-level consultant with 8–20 years in tech advisory, IT strategy leadership in complex organisations, and a record of selling AI projects into international banks and insurers.

I do not have four of those five things, and I am not going to imply otherwise. No tech advisory background, no consulting-firm pedigree, no IT strategy ownership, no seven-figure engagement sold into a financial institution.

I am applying against **two specific lines** in your brief:

> *"Act as Subject Matter Expert and impart knowledge, both internally and externally, on Artificial Intelligence tools, use cases and methodologies."*

>

> *"Work with clients to implement AI tools and technologies and advise on best practices."*

Those two are what I actually do, and have done commercially since **2022** — before the market had a name for it. If your client's gap is the advisory-and-adoption half of this role rather than the enterprise-sales half, that is a conversation worth ten minutes. If the gap is the sales half, stop reading here and I will not have wasted your time.

THE CASE, IN THREE FACTS

I put generative AI into a commercial marketing production line in 2022. Not a pilot, not a proof of concept — client-facing work, at Hong Kong's #1 baby e-commerce platform. Outcome: **A/B testing cycles cut 50%**, production cost materially reduced. That was roughly two years ahead of general industry adoption.

I sell AI methodology, and people pay for it. My Cantonese-language brand @aieasyjob converts into **B2B consulting engagements at HK\$13,800/month**. What clients buy is not tooling advice — it is the workflow, the templates and the quality gates. That is the commercial test of subject-matter expertise: someone paid for the knowledge transfer.

I teach it publicly, in two languages, on the record. 58 films written, directed and cut solo, eight of them in the last month. Public teaching is an unforgiving format — you cannot bluff a methodology to an audience that will try it the same evening.

WHY ADOPTION IS THE PART THAT ACTUALLY FAILS

Most enterprise AI programmes do not fail on model selection or tooling. They fail because the tool lands and the workflow does not change — the pilot succeeds, the rollout stalls, and six months later usage is concentrated in the three people who were enthusiastic anyway.

I have hit that wall on a small scale and worked out what fixes it:

Documented workflows per deliverable type, not per tool. People do not adopt "AI". They adopt "how I now produce this specific report". The unit of adoption is the deliverable.

A quality gate on every workflow. The fastest way to kill enterprise AI adoption is one embarrassing output reaching a client. Every workflow I build has a named check before anything leaves the building — which is also what makes it defensible in a regulated environment.

A transferability test. My standard: someone in their second week should produce output at the same standard without asking anyone. Undocumented AI skill inside an organisation is a single point of failure wearing the costume of an advantage.

Honest capacity arithmetic. I can say what a workflow saved — 50% off testing cycles, ~60% off production time — because I measured it before and after. Vague productivity claims are why finance functions stop believing AI business cases.

SELECTED EVIDENCE

Built AI production capability, then measured it

Introduced generative AI into creative and campaign production at **Baby Central** (Hong Kong's #1 baby e-commerce platform) in **2022**. Built prompt libraries, reusable templates and QC checklists rather than ad-hoc usage. **Testing cycles cut 50%**, production cost materially reduced, and output rose to **10+ campaign variants per cycle** while holding single-variable test discipline so results stayed attributable.

The discipline is the point. Volume without attribution is not a capability, it is noise.

Advised and implemented for clients, at SME scale

As an independent consultant since 2018: **20+ concurrent clients, HK\$3M+ cumulative ad spend at 3–7x ROAS**. Each engagement was scoped, delivered, reported and renewed by me alone — including the diagnostic conversation about what the client actually needed versus what they asked for. One turnaround: **ROAS 0.3x → 3x in 90 days** on a 70% cold-acquisition split.

Enterprise financial institutions are not SMEs. But the advisory motion — diagnose, recommend, implement, prove — is the same motion at a different order of magnitude, and I have run it end to end several hundred times.

Ran the reporting layer for people who do not speak the language

Owned **HK\$500K+/month** in Meta and Google spend and built the **GA4 and Meta Ads Manager dashboards** senior stakeholders reported off monthly. The deliverable was never the dashboard — it was getting three functions to agree what each number meant. Directly relevant to any AI programme where the business case has to survive a finance review.

Quality control across 200+ third parties

Sourced, briefed and enforced output standards across **200+ KOL and influencer partners** in HK and SEA, in a category where a careless claim is a liability — including rejecting work before a client saw it. This is the same muscle as governing AI-assisted output at scale.

Distribution built without budget

One **Facebook Reel reached 76,000 organic views from a page with 77 followers**, zero paid support; a second, built the same way, reached **11,000** — which is what tells you the first was structural rather than luck.

A note on honesty, since you will look: my channel's lifetime view total is large but roughly 60% of it comes from a single Japanese anime music cover. I am deliberately not using that number as evidence. The Reel figures above are the ones that mean something.

WHERE I WOULD BE OUT OF MY DEPTH

Enterprise sales into banks and insurers. I have never carried a consulting revenue quota or sold a project of that size. My commercial record is SME and mid-market, self-generated. If the role is measured primarily on pipeline into international financial institutions — which your brief says it is — I am the wrong candidate and I would rather say so.

IT strategy and Agile delivery. I have not led an IT strategy or run formal Agile delivery. I have run campaign programmes to deadline across many concurrent accounts, which is adjacent but not equivalent.

Financial services domain. Not my sector. I have done the reading for adjacent applications — the Money Lenders Ordinance licensing conditions, the HKMA Mandatory Reference Checking Scheme — so I know how to get up to speed on a regulatory perimeter, but I would be learning, not advising, in year one.

PROFESSIONAL EXPERIENCE

Founder & AI Workflow Consultant — @aieasyjob

2024 – Present | Hong Kong

- Built a Traditional Chinese / Cantonese brand teaching AI marketing workflows — **58 films to date, eight in the last month** — strategy, script, production and analytics solo.
- Converted the audience into **B2B consulting engagements at HK\$13,800/month**, delivering workflow design, template libraries and QC frameworks.
- Built an AI production pipeline (Claude, Claude Code, ChatGPT, Gemini, Midjourney, Notion AI) — production time cut ~60%.
- **76,000-view organic Facebook Reel from a 77-follower page**, zero paid support; second at 11,000.

Freelance Digital Marketing Consultant

Mar 2024 – Present | Hong Kong & regional

- **ROAS 0.3x → 3x in 90 days** for a fashion and lifestyle retailer on a 70% cold-acquisition split.
- **+200% conversion rate** via single-variable A/B testing at 10+ variants per cycle.

- Monthly client budgets **HK\$30K–200K** at consistent 3–7x ROAS.

B2C E-Commerce & Digital Marketing Manager

Baby Central Limited (Hong Kong's #1 baby e-commerce platform) / Bloom and Grow Limited

Jan 2022 – Feb 2024 | Hong Kong & SEA

- **Introduced generative AI into commercial creative and campaign production in 2022** — testing cycles cut 50%, production cost materially reduced.
- Owned **HK\$500K+/month** Meta and Google spend at 3–7x ROAS; **HK\$300K incremental GMV in five months; 30% organic traffic growth**.
- Owned a **30,000-subscriber Klaviyo lifecycle programme** — twice-weekly campaigns plus welcome, abandoned cart, post-purchase and win-back automation.
- Built **GA4 and Meta dashboards** for monthly senior-stakeholder reporting; scaled a **200+ KOL programme** with enforced output standards.

Freelance Digital Marketing Manager — 20+ Retail / Lifestyle / F&B Clients

Nov 2018 – Dec 2021 | Hong Kong

- **HK\$3M+ cumulative ad spend**, 20+ concurrent accounts at 3–7x ROAS; owned pitch, brief, delivery, reporting and renewal solo.

Product Marketing Executive — Mayborn Ltd (Tommee Tippee)

May 2018 – Nov 2018 | Hong Kong

- Social engagement **+15%** via 30+ micro-influencer partnerships; contributed to a **5x** organic traffic increase.

CERTIFICATIONS & EDUCATION

- **Executive Certificate in Growth Hacking & Data-Informed Marketing — The University of Hong Kong (2019)**
- Advanced Course for Generative AI in Digital Marketing — YMCA College (Dec 2024)
- All-in-One Full-Stack Marketing, No-Code & AI Agent Course (2025 – Present)
- BA Travel and Tourism Management — Northumbria University, UK (2005) · Associate Degree, City University of Hong Kong (2004)

AVAILABILITY & PACKAGE

Current: HK\$40,600 per month — self-employed consulting income. Gross, and excluding employer MPF contribution, paid annual leave and medical coverage, so not directly comparable to a permanent package.

Expected: HK\$49,000 – 54,000 per month base, excluding bonus. Morgan McKinley's 2026 Hong Kong reference point for a Digital Marketing Manager is HK\$55,000, and this range sits under it deliberately — I am pricing myself as an AI adoption and enablement hire, not as a Director-level advisory consultant, because that is what I am. Flexible depending on how the role is levelled and the total package — happy to anchor to your budgeted band rather than guess.

Availability: 2 weeks from agreed terms.

Location: Hong Kong, available on-site.
