AI Advisory / Consulting — Requirement-by-Requirement Assessment

+852 9298 1110 | ai@digitalanson.com | digitalanson.com | Hong Kong — available on-site

English (fluent, writing-grade) · Traditional Chinese (native, writing-grade) · Cantonese (native) · Mandarin (fluent)

PURPOSE OF THIS DOCUMENT

You are reviewing 100+ applications for a Director-level search. Most will assert a fit and leave you to disprove it.

This one does the opposite: it audits me against your brief, requirement by requirement, and marks each one **Met**, **Partial** or **Not met** — with the evidence for the first two and no excuse for the third. If the unmet requirements are dealbreakers, you will know inside sixty seconds and can move on. That is the intended outcome as much as the alternative.

Summary: 2 met, 2 partial, 5 not met.

REQUIREMENTS

#	Your requirement	Verdict	Evidence / gap
1	8–20 years' experience in the tech advisory space with a particular focus on AI	Partial	8 years' experience — but in digital and performance marketing, not tech advisory. AI focus is genuine and commercial since 2022.
2	Likely from within financial services and/or large consulting companies	Not met	Neither. E-commerce, retail, lifestyle, F&B; independent consultant.
3	Experience leading and implementing IT strategies within complex organisations	Not met	I have not led an IT strategy. Nearest adjacent: marketing stack ownership, GA4 / UTM / pixel governance. Not equivalent, and I will not present it as such.
4	Expertise in selling tech and/or AI focused projects into international banks and/or insurers	Not met	No bank or insurer logo, no consulting quota, no seven-figure close. My deals are five-figure monthly retainers with SME and mid-market owners.
5	Solid understanding of both Agile and traditional project management	Not met	No formal Agile delivery experience. I have run multi-account campaign programmes to fixed deadlines, which is adjacent, not equivalent.
6	Fluent in English, oral and written — essential	Met	Writing-grade. All client-facing copy, decks and reporting authored by me.

#	Your requirement	Verdict	Evidence / gap
7	Cantonese and/or Mandarin — definite bonus	Met	Cantonese native; Mandarin fluent; Traditional Chinese writing-grade. I produce publication-standard Chinese copy without a translator.
8	Act as Subject Matter Expert, imparting knowledge internally and externally on AI tools, use cases and methodologies	Met	Commercial genAI production since 2022. Teach it publicly — 58 films, eight in the last month. Sell the methodology at HK\$13,800/month.
9	Work with clients to implement AI tools and technologies and advise on best practices	Partial	Done repeatedly, at SME and mid-market scale. No enterprise or regulated-environment implementation.
—	Primarily a business development role focusing on international financial institutions	Not met	Self-generated revenue for 8 years, 20+ accounts won and renewed — but never into a financial institution, and never at consulting deal size.

EVIDENCE FOR THE FOUR I CLAIM

Requirement 8 — Subject Matter Expert on AI tools, use cases and methodologies

Commercial deployment in 2022, not a pilot. Introduced generative AI into creative and campaign production at **Baby Central**, Hong Kong's #1 baby e-commerce platform — client-facing work, roughly two years ahead of general adoption. Built prompt libraries, reusable templates and QC gates rather than ad-hoc usage.

Measured, not asserted: testing cycles cut **50%**, production time cut **~60%**, output raised to **10+ campaign variants per cycle** while holding single-variable test discipline so every result stayed attributable to one change.

Knowledge transfer is the product, and it has a price. @aieasyjob converts into **B2B consulting engagements at HK\$13,800/month** — clients buy the workflow, the templates and the quality gates, not tooling opinions. **58 films written, directed and cut solo, eight of them in the last month**, teaching methodology publicly in Cantonese.

Working tools: Claude and Claude Code, ChatGPT, Gemini, Midjourney, Notion AI, Zapier / Make-style automation chaining.

Requirement 9 (Partial) — Implementing AI tools with clients

Delivered inside **20+ concurrent client engagements** since 2018 — **HK\$3M+ cumulative ad spend at 3–7x ROAS** — where the AI layer was production capacity, not a talking point. The advisory motion (diagnose, recommend, implement, prove) is one I have run end to end several hundred times. **The scale is SME, and enterprise regulated implementation is a different discipline that I have not practised.**

Requirements 6 and 7 — Language

Traditional Chinese and English both writing-grade. In a Hong Kong financial services context this is load-bearing rather than decorative: regulated copy that has to be right in both languages does not survive a translation round-trip. I have done the regulatory reading for adjacent applications — Money Lenders Ordinance licensing conditions, HKMA Mandatory Reference Checking Scheme — so I know how to read a compliance perimeter, while noting I would be learning the sector, not advising on it.

WHAT I WOULD BE, IF NOT THIS

For completeness, since you search across fintech, payments, digital strategy, insurtech, data science and AI for banks, insurers and consultancies: **I am a Manager-level digital and performance marketer who is genuinely AI-native, moving deliberately into Hong Kong financial services.**

- **HK\$500K+/month** budget owned in-house at peak; **HK\$3M+** cumulative; consistent **3–7x ROAS**
- **ROAS 0.3x → 3x in 90 days** rebuilding a failing account on a 70% cold-acquisition split
- **+200% conversion rate** through structured single-variable A/B testing
- **30,000-subscriber Klaviyo lifecycle programme; 200+ KOL programme** with enforced output standards
- **GA4 and Meta dashboards** built for senior stakeholders who do not speak marketing
- **76,000 organic views on one Facebook Reel from a 77-follower page**, zero paid; a second at **11,000** confirming it was structural

A correction offered before it is discovered: my channel's lifetime view total is large, but roughly 60% comes from a single Japanese anime music cover while the AI and marketing films sit in the hundreds to low thousands. I do not use the aggregate as evidence. The Reel figures above are the ones that hold.

EXPERIENCE

Founder & AI Workflow Consultant — @aieasyjob · 2024 – Present, Hong Kong

Cantonese brand built solo across three platforms — 58 films, eight in the last month. AI production pipeline, production time cut ~60%. **B2B consulting at HK\$13,800/month.**

Freelance Digital Marketing Consultant · Mar 2024 – Present, Hong Kong & regional

ROAS 0.3x → 3x in 90 days; +200% conversion rate via single-variable testing at 10+ variants per cycle; client budgets **HK\$30K–200K/month** at 3–7x ROAS.

B2C E-Commerce & Digital Marketing Manager — Baby Central Ltd / Bloom and Grow Ltd · Jan 2022 – Feb 2024, Hong Kong & SEA

HK\$500K+/month Meta and Google at 3–7x ROAS; **HK\$300K incremental GMV in five months; 30% organic traffic growth**; 30,000-subscriber Klaviyo programme; 200+ KOL programme; GA4 and Meta dashboards; **generative AI into commercial production in 2022.**

Freelance Digital Marketing Manager — 20+ Retail / Lifestyle / F&B Clients · Nov 2018 – Dec 2021, Hong Kong

HK\$3M+ cumulative ad spend, 20+ concurrent accounts at 3–7x ROAS; sourced, pitched, delivered and renewed solo.

Product Marketing Executive — Mayborn Ltd (Tommee Tippee) · May 2018 – Nov 2018, Hong Kong

Social engagement **+15%**; contributed to a **5x** organic traffic increase.

CERTIFICATIONS & EDUCATION

Executive Certificate in Growth Hacking & Data-Informed Marketing — The University of Hong Kong (2019) ·

Advanced Course for Generative AI in Digital Marketing, YMCA College (Dec 2024) · All-in-One Full-Stack Marketing, No-Code & AI Agent Course (2025 – Present) · BA Travel and Tourism Management, Northumbria University UK (2005) · Associate Degree, City University of Hong Kong (2004)

AVAILABILITY & PACKAGE

Current: HK\$40,600 per month — self-employed consulting income. Gross, and excluding employer MPF contribution, paid annual leave and medical coverage, so not directly comparable to a permanent package.

Expected: HK\$49,000 – 54,000 per month base, excluding bonus. Morgan McKinley's 2026 Hong Kong reference point for a Digital Marketing Manager is HK\$55,000, and this range sits under it — priced at Manager level, not at Director level in a global consultancy, because the audit above is what it is. Flexible depending on how the role is levelled and the total package — happy to anchor to your budgeted band rather than guess.

Availability: 2 weeks from agreed terms.

Location: Hong Kong, available on-site.
