THE SHORT VERSION

I have spent two years doing, unpaid and at my own risk, the exact thing an AI education company needs done: making AI comprehensible to a Hong Kong audience in Cantonese, at volume, and proving it with numbers.

@aieasyjob is my own AI education brand — 57 videos, 84,000+ YouTube views, and a Facebook Reel that reached **76,000 organic views from a 77-follower page**. That is roughly 990x follower count and 210x channel median, with zero paid support. A second Reel reached 11,000, which is how I know it was structure and not luck.

Before that, and alongside it, I ran real budgets: **HK\$3M+ cumulative ad spend at 3–10x ROAS**, including **HK\$500K+/month** at Hong Kong's #1 baby e-commerce platform.

So: someone who understands both the money side of growth and the specific problem of explaining AI to people who did not ask for it.

Cantonese (native) · English (fluent) · Mandarin (fluent) · Hong Kong-based

WHY AI EDUCATION SPECIFICALLY

I did not arrive at AI through marketing. I introduced generative AI into commercial creative production in **2022** — roughly two years before the industry did — because it solved a throughput problem I had. Everything since has been building on that: prompt systems, chained workflows, custom skills, automated research and production pipelines.

Then I started teaching it. @aieasyjob exists because I kept meeting Hong Kong professionals who knew AI mattered and had no idea where to start, and because almost nothing useful existed for them **in Cantonese**.

Two years of doing that has taught me things that do not appear on a performance-marketing CV:

- **Where the comprehension actually breaks.** Not at the tool — at the first step. People do not fail because Claude is hard; they fail because nobody told them what to do on Monday morning. Content that starts at the tool loses them.
- **What earns attention in this category.** The 76,000-view Reel worked because of a first-frame pattern interrupt and a tension-led opening, tested weekly against real retention data — not because the topic was AI.
- **What Hong Kong educators and professionals actually ask.** From two years of comments, DMs and consulting enquiries. That is primary audience research most companies pay for.

An AI education company is selling a behaviour change, not software. I have been running that experiment on myself, publicly, weekly, for two years.

PROOF

What	Result
Facebook Reel, organic, from a 77-follower page	76,000 views — ~990x followers, ~210x channel median
Second Reel, same structural approach	11,000 views — result was structural, not incidental
YouTube @aieasyjob	84,000+ views across 57 videos
YouTube, trailing 30 days	6,700+ views / 7 videos published
Paid amplification across all channels	None — fully organic
Content-to-revenue	B2B consulting enquiries at HK\$13,800/month packages, sourced from organic content
Paid growth track record	Result
Cumulative ad spend managed	HK\$3M+ at 3–10x ROAS across 20+ clients
Peak monthly budget owned	HK\$500K+/month at 3–7x ROAS (Baby Central, HK & SEA)
Incremental GMV	HK\$300K in 5 months

Paid growth track record	Result
Account turnaround	ROAS 0.3x → 3x in 90 days , on a 70% cold-prospecting split
AI-assisted creative testing	+200% conversion rate , peak campaigns 10x+ ROAS
KOL / influencer programme	200+ partnerships across HK and SEA
Lifecycle email	Klaviyo, 30,000 subscribers

HOW I'D APPLY IT TO AN AI EDUCATION BUSINESS

Teachers are the channel, not the audience. A teacher who has made an AI tool work in one classroom is worth more than any ad. I built a 200+ KOL programme at Baby Central using exactly this logic in another trust-gated category — identify the practitioners already succeeding, equip them properly, and let peer proof carry it. Teacher advocacy is the same machine with a different roster.

Cantonese-first, not Cantonese-translated. Most edtech content in Hong Kong reads as English material that has been through a translator. It does not land. Everything I publish is written natively in Cantonese for a Hong Kong audience, and the engagement difference is the entire reason the channel works.

Content that answers the real question. For schools that is not "what is AI" — it is "how do I justify this to my principal, what do I do in week one, and how do I know it worked." That is a content architecture problem, and it maps directly onto the funding conversation every Hong Kong school is now having.

Volume without quality collapse. I sustain weekly multi-platform output as one person because I built the pipeline for it — reusable prompt templates with conditional logic and QC checklists, automated competitor and trend monitoring, automated carousel generation, enforced naming and version control. That system is portable, and it is what lets a small team publish like a large one.

WHERE I'D BE LEARNING

I have no institutional B2B or edtech background. School procurement — committee decisions, funding calendars, eLAFP and QEF vendor pathways, EDB policy timing — is genuinely different from a DTC funnel, and I would be starting from zero on it.

What I would bring to that gap is the habit of learning a category fast and in public: I have adapted brand voice, funnel architecture and messaging across 20+ brands in retail, lifestyle, F&B and e-commerce, and I built an AI education audience from nothing in a language nobody else was serving. I would rather name the gap than have it found.

AI PRODUCTION STACK

Reasoning & production: Claude (daily — custom skills, chained multi-step workflows, scripting, briefs, competitor teardowns) · ChatGPT · Gemini · Perplexity

Visual & video: Midjourney · Ideogram · Seedance · Nano Banana · CapCut · Canva

Analytics & ops: GA4 · Meta Ads Manager · Klaviyo · Notion · Shopify

Applied daily to: script generation and structural editing · brief-to-visual production · systematic copy variant generation · reusable templates with conditional logic and QC checklists · AI-powered competitor and trend research · automated carousel production · persona building and funnel messaging.

EXPERIENCE

Founder & AI Education Creator — @aieasyjob

2024 – Present | Hong Kong

Cantonese-language AI education brand built solo across YouTube, Instagram and Facebook. Full ownership: strategy, scripting, shooting, editing, publishing, analytics. 84,000+ YouTube views / 57 videos. 76,000-view organic Facebook Reel from a 77-follower base. Weekly hypothesis-driven testing on hooks, thumbnails and formats against native retention data, compounded into a documented playbook. Converted audience trust into B2B consulting revenue.

Freelance Digital Marketing Consultant

Mar 2024 – Present | Hong Kong & Regional Clients

Meta Ads turnaround from 0.3x to 3x ROAS in 90 days. +200% conversion rate through AI-assisted creative testing. Monthly Shopify DTC budgets of HK\$30K–200K per client at 3–7x ROAS. Klaviyo lifecycle flows driving repeat

purchase revenue. AI-generated personas and three-stage funnel creative for a multi-regional hair care brand, cutting testing cycles 50%.

B2C E-Commerce & Digital Marketing Manager
Baby Central Limited (HK's #1 baby e-commerce platform) / Bloom and Grow Limited

Jan 2022 – Feb 2024 | Hong Kong & SEA

HK\$500K+/month Meta and Google spend at 3–7x ROAS. HK\$300K incremental GMV in 5 months. 200+ KOL and influencer programme across HK and SEA. Klaviyo for 30,000 subscribers. 30% organic traffic growth. **Pioneered generative AI in creative production in 2022** — two years ahead of industry adoption.

Freelance Digital Marketing Manager — 20+ Clients

Nov 2018 – Dec 2021 | Hong Kong

HK\$3M+ cumulative ad spend at 3–7x ROAS across retail, lifestyle and F&B.

Product Marketing Executive — Mayborn Ltd (Tommee Tippee)

May 2018 – Nov 2018 | Hong Kong

+15% social engagement via 30+ micro-influencer partnerships; 5x organic traffic growth.

CERTIFICATIONS

- All-in-One Full-Stack Marketing, No-Code & AI Agent Course (2025 – Present)
- Advanced Course for Generative AI in Digital Marketing — YMCA College (Dec 2024)
- Executive Certificate in Growth Hacking & Data-Informed Marketing — HKU (2019)

EDUCATION

Bachelor of Arts, Travel and Tourism Management — Northumbria University, UK (2005)

Associate Degree, Leisure and Tourism Management — City University of Hong Kong (2004)
