Growth & Demand Capture — Performance Marketing

+852 9298 1110 | ai@digitalanson.com | digitalanson.com | youtube.com/@aieasyjob | IG @aieasyjob | FB: AI 係咁易

PROFESSIONAL SUMMARY

Performance marketer with 8 years running paid and organic growth against revenue targets — **HK\$3M+ cumulative ad spend at 3–10x ROAS**, peaking at **HK\$500K+/month** at Hong Kong's #1 baby e-commerce platform. I am hired when someone needs a budget to produce attributable revenue, and I report against pipeline rather than impressions.

Alongside that I built **@aieasyjob**, a Cantonese AI education brand, from zero to 84,000+ YouTube views and a 76,000-view organic Facebook Reel from a 77-follower page — proof that I can generate demand with no budget as well as spend one well.

Trilingual: **Cantonese (native)**, English (fluent), Mandarin (fluent). Hong Kong-based.

THE COMMERCIAL SITUATION I'D BE HIRED INTO

Hong Kong's education sector is in a **time-boxed budget event**. Under the AI for Empowering Learning and Teaching programme, schools can receive a **one-off HK\$500,000 grant** for school-based AI initiatives, against a **HK\$500M** three-year envelope — sitting alongside roughly **HK\$2B** of Quality Education Fund money earmarked for digital education, plus a new blueprint mandating AI literacy and teacher training.

Every school in the territory now has budget and a mandate. What they do not have is certainty about which vendor to spend it on.

That is a demand-capture problem, and it has a shape I recognise:

- **A defined buyer set** — roughly 1,000 primary and 500 secondary schools. That is a finite, addressable, nameable market. Every one of them is reachable.
- **A defined decision unit** — principal, IT coordinator, panel head, and increasingly a procurement committee. Multiple readers, different objections, one signature.
- **A defined window** — grants get allocated, then they are gone. Share of voice during the allocation period compounds; share of voice after it does not.
- **A defined competitive test** — a school comparing two vendors will ask which one is on the approved funding pathway. Any gap there is a marketing problem before it is a product problem, and it needs an answer prepared rather than improvised.

I would treat this as a campaign with a deadline, not an always-on brand programme.

HOW I'D RUN IT

Instrument first. No spend goes out before GA4, UTM discipline, and a pipeline view that ties a piece of content to a demo request to a signed school. I have built exactly this at Baby Central — GA4 and Meta Ads Manager dashboards feeding monthly senior-stakeholder reporting — and I will not defend a budget I cannot attribute.

Fix the proof layer before amplifying it. Adoption claims currently appear as 80+, 100+, 150+ and 200+ schools across different company properties, all live at once. In a consumer funnel that is untidy; in an institutional sale it is a procurement objection waiting to happen. One verified number, applied everywhere, before a dollar goes into paid.

Build for a committee, not a click. A school does not convert on a landing page. The asset set is: a comparison page that survives being read next to a competitor's, a funding-application-ready one-pager a coordinator can forward upward, case evidence from named schools, and a nurture sequence that keeps the account warm across a multi-month cycle. I have run 30,000-subscriber lifecycle programmes in Klaviyo — a long consideration cycle is a lifecycle problem, and lifecycle is a discipline I already have.

Capture the search that the funding creates. When a principal starts spending, they search. Being the answer at that moment is worth more than any awareness campaign. I grew organic traffic 30% at Baby Central through integrated SEO and paid social, and I run AI-assisted competitor and trend monitoring that feeds directly into the next content cycle.

Let practitioners carry it. I built and scaled a 200+ KOL and influencer programme across HK and SEA in a trust-gated category. Teacher advocacy is the same machine: find the teachers already succeeding with the product, equip them, and let peer proof do the work that advertising cannot.

TRACK RECORD

HK\$500K+/month owned, tied to revenue

Baby Central — Hong Kong's #1 baby e-commerce platform, high-growth scaling across HK and SEA. Owned performance and creative across Meta and Google (Search, Shopping, Performance Max, retargeting) at consistent **3–7x ROAS**. Delivered **HK\$300K incremental GMV in 5 months** and **30% organic traffic growth**. Built the dashboards that connected creative decisions to revenue rather than engagement proxies.

Turned a losing account around: 0.3x → 3x ROAS in 90 days

Fashion and lifestyle retail client, budget trapped in warm retargeting with a stale creative pool. Rebuilt the full-funnel strategy, moved **70% of budget into cold prospecting**, and ran single-variable tests to isolate which hooks — not which audiences — were driving the failure. Reached **3x ROAS in 90 days on a majority-prospecting split**: net-new acquisition, not demand harvesting.

+200% conversion rate through systematic testing

Built an AI-assisted variant production pipeline raising output to **10+ creative variants per testing cycle** while holding single-variable discipline so results stayed attributable. Result: **+200% conversion rate** across Meta and Instagram, peak campaigns at **10x+ ROAS**, testing cycle time cut ~50%.

HK\$3M+ across 20+ brands

Managed cumulative spend across retail, lifestyle and F&B at consistent **3–7x ROAS**, adapting funnel architecture and messaging to each brand's audience and sales cycle.

Demand generated with no budget at all

@aieasyjob — 84,000+ YouTube views / 57 videos. A **76,000-view organic Facebook Reel from a 77-follower page** (~990x follower count, ~210x channel median), zero paid support; a second at 11,000 confirming structure over luck. Converted into B2B consulting enquiries at HK\$13,800/month packages.

METRIC DISCIPLINE

I read performance down the funnel, not at the top of it: **thumb-stop and hook rate** → **CTR** → **CVR** → **CPA** → **ROAS** / **pipeline value**. Creative that wins on engagement and dies downstream gets retired, not scaled. Budget runs on a **70/30 split** between proven and actively tested, with single-variable sequencing — hook, then message, then format — so every result is attributable and every winner is documented into a playbook rather than re-derived next quarter.

For an institutional sale I would extend that ladder to: **content engagement** → **qualified school enquiry** → **demo/pilot** → **signed licence** → **renewal**, and hold the budget accountable at the pipeline end of it.

CAPABILITIES

Paid — Meta Ads (prospecting + retargeting) · Google Ads (Search, Shopping, Performance Max) · TikTok · budget allocation, pacing and reallocation

Measurement — GA4 · UTM and pixel governance · attribution modelling · dashboard build · monthly senior-stakeholder reporting

Organic & search — SEO and paid-social integration · content-led demand capture · AI-assisted competitor and trend monitoring

Lifecycle & CRO — Klaviyo (30,000 subscribers): welcome, abandoned cart, post-purchase, win-back · landing page messaging · conversion rate optimisation

Partnerships — 200+ KOL and influencer partnerships (HK & SEA) · creator briefing · UGC frameworks · channel co-marketing

AI operations — Claude (daily, custom skills and chained workflows) · ChatGPT · Gemini · Midjourney · Ideogram · reusable prompt templates with QC checklists · automated asset production. In production use since **2022**, roughly two years ahead of industry adoption.

WHERE THE GAP IS

My background is **B2C and DTC e-commerce performance**, not institutional B2B. I have never run a government-subsidised procurement cycle, and I would be learning the eLAFP and QEF vendor pathways, the EDB funding calendar and the school buying committee from scratch.

I am flagging it rather than papering over it, because the transferable half is the part that is hard to hire: budget discipline, attribution that survives scrutiny, creative testing at volume, partner-led distribution, and lifecycle nurture across a long cycle. The procurement mechanics are learnable in a quarter. The instinct for what a budget should be producing is not.

EXPERIENCE

Founder & Growth Operator — @aieasyjob

2024 – Present | Hong Kong

- Built a Cantonese AI education brand from zero, solo, across YouTube, Instagram and Facebook on a sustained weekly cadence.
- 84,000+ YouTube views / 57 videos; 76,000-view organic Facebook Reel from a 77-follower base; second Reel at 11,000.
- Ran the channel as a live testing lab — weekly hypothesis-driven tests scored against native retention and thumb-stop data, compounded into a documented playbook.
- Built an AI production pipeline cutting scripting time ~60% and enabling same-day concept-to-publish.
- Converted organic audience into B2B consulting revenue at HK\$13,800/month packages.

Freelance Digital Marketing Consultant

Mar 2024 – Present | Hong Kong & Regional Clients

- Meta Ads turnaround 0.3x → 3x ROAS in 90 days on a 70% cold-prospecting split.
- +200% conversion rate via AI-assisted creative testing; peak campaigns 10x+ ROAS.
- Monthly Shopify DTC budgets of HK\$30K–200K per client at 3–7x ROAS.
- Klaviyo lifecycle flows driving measurable repeat purchase revenue.

B2C E-Commerce & Digital Marketing Manager

Baby Central Limited (HK's #1 baby e-commerce platform) / Bloom and Grow Limited

Jan 2022 – Feb 2024 | Hong Kong & SEA

- HK\$500K+/month Meta and Google spend at 3–7x ROAS across HK and SEA.
- HK\$300K incremental GMV in 5 months; 30% organic traffic growth via SEO + paid social.
- Built and scaled a 200+ KOL and influencer programme across HK and SEA.
- Owned Klaviyo content-to-conversion for 30,000 subscribers.
- Built GA4 and Meta Ads Manager dashboards for monthly senior-stakeholder reporting.
- Pioneered generative AI in creative production in 2022 — A/B cycles cut 50%.

Freelance Digital Marketing Manager — 20+ Retail / Lifestyle / F&B Clients

Nov 2018 – Dec 2021 | Hong Kong

- HK\$3M+ cumulative ad spend at consistent 3–7x ROAS across diverse verticals.

Product Marketing Executive — Mayborn Ltd (Tommee Tippee)

May 2018 – Nov 2018 | Hong Kong

- +15% social engagement via 30+ micro-influencer partnerships; 5x organic traffic growth.

CERTIFICATIONS

- All-in-One Full-Stack Marketing, No-Code & AI Agent Course (2025 – Present)
- Advanced Course for Generative AI in Digital Marketing — YMCA College (Dec 2024)
- Executive Certificate in Growth Hacking & Data-Informed Marketing — HKU (2019)

EDUCATION

Bachelor of Arts, Travel and Tourism Management — Northumbria University, UK (2005)

Associate Degree, Leisure and Tourism Management — City University of Hong Kong (2004)

LANGUAGES

Cantonese (native) · English (fluent) · Mandarin (fluent)
