

ANSON CHAN

AI-Native Creative Strategist

+852 9298 1110 | ai@digitalanson.com | digitalanson.com | youtube.com/@aieasyjob | IG @aieasyjob | FB: AI 係咁易

PROFESSIONAL SUMMARY

AI-native Creative Strategist who runs generative AI as production infrastructure, not as a novelty. 7+ years in creative and performance marketing for consumer and DTC brands (HK\$3M+ managed spend at 3–10x ROAS), now operating an end-to-end AI creative pipeline: Claude for scripting, briefs and multi-step workflow automation; Midjourney, Ideogram and Seedance 2.0 for visual and video production; automated carousel generation; and AI-assisted variant production at 10+ creatives per testing cycle.

Introduced generative AI into commercial creative production in **2022** — roughly two years ahead of industry adoption — cutting A/B testing cycles by 50% and production cost materially at Hong Kong's #1 baby e-commerce platform. Now builds custom Claude skills and multi-agent pipelines that let a solo operator sustain a weekly multi-platform publishing cadence at agency-level output quality.

The pipeline is proven on live distribution, not in a sandbox: @aieasyjob produced a **76,000-view organic Facebook Reel from a 77-follower page** — approximately 990x follower count and 210x channel median, with zero paid support — plus 84,000+ YouTube views across 57 videos. AI accelerates the output; the creative judgment and testing discipline are what make it convert.

Trilingual: Cantonese (native), English (fluent), Mandarin (fluent). Available for remote, Hong Kong-based.

AI CREATIVE STACK — DAILY OPERATIONAL USE

Layer	Tools	What it does in the workflow
Reasoning & orchestration	Claude (primary, daily)	Scripting, structural editing, creative briefs, competitor teardowns, custom skills, multi-step pipeline automation
Copy & concept	Claude, ChatGPT, Gemini	Hook variants, ad copy, angle generation, persona-led messaging, caption systems
Visual production	Midjourney, Ideogram, Nano Banana, Leonardo.ai	Brief-to-visual production, carousel assets, thumbnail concepts
Video generation	Seedance 2.0, CapCut, Filmora	AI video generation, edit assembly, subtitle burn-in
Research	Perplexity, AI-assisted outlier detection	Competitor teardowns, trend and platform-change monitoring
Analytics & ops	GA4, Meta Ads Manager, Klaviyo, Notion	Performance reads, content hub, asset library governance

AI PRODUCTION SYSTEMS BUILT

Reusable prompt template library. Templates with conditional logic and embedded QC checklists, so output quality does not depend on the operator remembering standards. Cuts scripting time approximately 60% and enables same-day concept-to-publish.

Automated carousel generation pipeline. Image-matching logic plus enforced design standards, producing on-brand multi-slide visual assets at scale without a designer in the loop.

AI variant production for creative testing. 10+ creative variants per cycle across copy and visual, generated under a single-variable testing discipline so throughput does not destroy attribution. Testing cycle time cut ~50%.

Custom Claude skills and multi-step pipelines. Purpose-built workflows for recurring creative operations — content research, script drafting, cross-platform repurposing, competitor monitoring — chained rather than re-prompted each time.

Asset governance layer. Naming conventions, tagging and version control so a rapidly growing AI-generated asset library stays searchable as volume scales.

AI research loop. YouTube outlier detection, Instagram viral post analysis and platform-change tracking feeding directly into the next testing cycle, rather than accumulating in reports nobody reads.

PROOF: AI-PRODUCED CREATIVE ON LIVE DISTRIBUTION (VERIFIED, JULY 2026)

Channel	Metric	Result
Facebook (AI 係咁易)	Top Reel, organic	76,000 views
Facebook	Second Reel above 10K	11,000 views
Facebook	Outlier ratio vs channel median	~210x
Facebook	Views vs 77-follower base	~990x
YouTube (@aieasyjob)	Cumulative views / videos	84,000+ / 57
YouTube	Videos published, trailing 30 days	7
Production model	Team size	Solo operator, AI-augmented
Paid amplification	Spend	None — fully organic

CORE COMPETENCIES

AI-Accelerated Creative Production

AI scripting & copywriting · Prompt engineering with conditional logic · Automated asset pipelines · AI video generation · Multi-platform repurposing at scale · QC systems for AI output · Asset naming, tagging & version control

Creative Strategy & Direction

Creative concept development · Storytelling & narrative structure · Hook and thumb-stop design · Creative briefs, scripting & storyboarding · Brand voice adaptation · Creative direction across video, static and carousel

Performance & Testing

Structured creative testing roadmaps · Single-variable testing (hook → messaging → format) · ROAS, CTR, CVR, CPA · Hook rate, thumb-stop rate, retention analysis · Creative playbooks · GA4 dashboards & performance reporting

Audience, UGC & Growth

Customer personas & journey-stage content · UGC frameworks & creator briefing · 200+ KOL partnership programme · Klaviyo lifecycle (30,000 subscribers) · CRO & landing page messaging · Meta / Google / TikTok paid social

SIGNATURE CASE STUDIES

1. Early Generative AI Adoption in Commercial Creative — 2022

Context. At Baby Central, creative testing throughput was the bottleneck on a HK\$500K+/month paid programme. Generative AI was not yet standard practice in Hong Kong marketing teams.

Action. Integrated ChatGPT and Ideogram directly into the creative production workflow — copy variant generation and visual asset production — and rebuilt the testing process around the higher throughput this made possible, rather than bolting AI onto an unchanged process.

Result. A/B testing cycles cut by 50% and content production cost reduced materially, roughly two years before industry-wide adoption. The account sustained consistent 3–7x ROAS on HK\$500K+/month spend throughout.

2. AI Pipeline Enabling Solo Multi-Platform Output — @aieasyjob

Context. Building a multi-platform content brand from zero with no team, no budget and no existing distribution — a workload that normally requires a small production unit.

Action. Designed an end-to-end AI pipeline: Claude for scripting and structural editing, Midjourney and Ideogram for visuals, Seedance 2.0 for AI video, CapCut for assembly, and reusable templates with QC checklists governing the whole chain. Built an automated carousel generation system with image-matching logic to remove the design bottleneck entirely.

Result. Sustained weekly output across YouTube long-form and Shorts, Instagram Reels and carousels, and Facebook Reels as a single operator — 57 YouTube videos and 84,000+ views, with 7 videos published in the trailing 30 days. Scripting time cut ~60%.

3. AI Variant Production Driving +200% Conversion Rate

Context. Client creative testing was limited to a handful of variants per cycle, producing slow, low-confidence learning and long periods running unvalidated creative.

Action. Built an AI-assisted variant production pipeline generating 10+ creative variants per cycle across copy and visual, while holding single-variable testing discipline so that increased throughput did not compromise attribution.

Result. +200% conversion rate across Meta Ads and Instagram, peak campaigns at 10x+ ROAS, and testing cycle time cut ~50% — compounding learning velocity across the account.

4. Organic Creative Outlier — 76,000 Views from 77 Followers

Context. @aieasyjob's Facebook page had 77 followers and a channel median around 360 views per Reel — effectively zero distribution advantage.

Action. Applied a hook structure refined through weekly AI-assisted testing: first-frame pattern-interrupt, tension-led opening beat, payoff timed against observed drop-off points. Generated and tested hook and opening-visual variants weekly against native retention and thumb-stop data.

Result. 76,000 organic views on a single Reel — ~210x channel median, ~990x follower count, zero ad spend — with a second Reel at 11,000 views confirming the result was structural, not incidental.

PROFESSIONAL EXPERIENCE

Founder & Creative Operator — @aieasyjob (YouTube · Instagram · Facebook)

2024 – Present | Hong Kong (Global Audience)

- Designed and operate an end-to-end AI production pipeline enabling a solo operator to sustain weekly multi-platform output — 57 YouTube videos, 84,000+ cumulative views, plus Instagram and Facebook Reels.
- Produced a 76,000-view organic Facebook Reel from a 77-follower base (~990x follower count, ~210x channel median), plus a second Reel at 11,000 views, with zero paid support.
- Built an automated carousel generation system with image-matching logic and enforced design standards — removing the design bottleneck for visual content at scale.
- Built custom Claude skills and multi-step pipelines for recurring creative operations — research, scripting, cross-platform repurposing, competitor monitoring.
- Run weekly AI-assisted creative testing on hooks, thumbnails and captions, scored against native analytics and compounded into a documented creative playbook.
- Converted content into revenue — B2B consulting enquiries and proposals at HK\$13,800/month packages sourced directly from organic content.

Freelance Digital Marketing Consultant

Mar 2024 – Present | Hong Kong & Regional Clients, Remote (APAC)

- Generated 10+ AI-produced creative variants per testing cycle on Meta Ads and Instagram — +200% conversion rate, peak ROAS 10x+.
- Used Claude and ChatGPT to build customer personas and three-stage funnel messaging for a multi-regional hair care brand — testing cycles cut 50%.
- Rebuilt a fashion and lifestyle retailer's Meta creative strategy — ROAS 0.3x to 3x within 90 days, with 70% of budget on cold-audience prospecting.
- Managed monthly Shopify DTC budgets of HK\$30K–200K per client at consistent 3–7x ROAS.

B2C E-Commerce & Digital Marketing Manager

Baby Central Limited (HK's #1 baby e-commerce platform) / Bloom and Grow Limited

Jan 2022 – Feb 2024 | Hong Kong & SEA

- Pioneered generative AI (ChatGPT, Ideogram) in the creative production workflow in 2022 — A/B testing cycles cut 50%, production cost materially reduced, ~2 years ahead of industry adoption.
- Led creative direction and performance for HK\$500K+/month Meta and Google spend at consistent 3–7x ROAS across HK and SEA.
- Drove HK\$300K incremental GMV within 5 months through data-driven Shopify campaign targeting.
- Scaled a 200+ KOL and influencer programme as a working UGC engine across HK and SEA.
- Owned the Klaviyo system for 30,000 subscribers — 2x weekly campaigns plus welcome, abandoned cart, post-purchase and win-back automation.
- Grew organic traffic 30%; built GA4 and Meta dashboards for monthly senior-stakeholder reporting.

Freelance Digital Marketing Manager — 20+ Retail / Lifestyle / F&B Clients

Nov 2018 – Dec 2021 | Hong Kong

- HK\$3M+ cumulative ad spend with repeatable creative frameworks at consistent 3–7x ROAS across diverse verticals and sales cycles.

Product Marketing Executive — Mayborn Ltd (Tommee Tippee)

May 2018 – Nov 2018 | Hong Kong

- Grew social engagement 15% via 30+ micro-influencer partnerships generating 3,000+ engagements; contributed to 5x organic traffic growth.

PORTFOLIO & OWNED CHANNELS

Asset	Link	What it demonstrates
Portfolio site	digitalanson.com	Positioning, messaging and landing page copy
YouTube	youtube.com/@aieasyjob	AI-produced long-form and Shorts — 84,000+ views / 57 videos
Instagram	@aieasyjob	AI-generated carousel pipeline output and Reels hook design
Facebook	AI 係咁易	76,000-view organic Reel — AI-assisted hook structure at ~990x follower count

Live walkthrough of the Claude pipeline, prompt template library and carousel automation system available on request.

CERTIFICATIONS

- All-in-One Full-Stack Marketing, No-Code & AI Agent Course (Online, 2025 – Present)
- Advanced Course for Generative AI in Digital Marketing — YMCA College (Dec 2024)
- Executive Certificate in Growth Hacking & Data-Informed Marketing — HKU (2019)

EDUCATION

Bachelor of Arts, Travel and Tourism Management — Northumbria University, UK (2005)
