

ANSON CHAN

Digital Marketing Manager — AI-Focused

+852 9298 1110 | ai@digitalanson.com | digitalanson.com | Hong Kong — available on-site

English (fluent, writing-grade) · Cantonese (native) · Mandarin (fluent) · Traditional Chinese (native, writing-grade)

PROFESSIONAL SUMMARY

Digital marketing manager with **8 years** running campaigns against revenue targets in Hong Kong and Southeast Asia — **HK\$3M+ cumulative ad spend at 3–10x ROAS**, peaking at **HK\$500K+/month** at Hong Kong's #1 baby e-commerce platform, with GA4 and Meta dashboards built for monthly senior-stakeholder reporting.

The less common half: I have been building and **teaching** AI production systems since **2022**, roughly two years before the industry moved. Reusable prompt architectures with conditional logic and QC checklists, chained multi-step workflows, custom skills for research and briefing — and for the past two years, a public Cantonese channel whose entire purpose is getting non-technical people to actually start using these tools.

That second half is why this role interests me specifically. Rolling out AI inside an organisation rarely fails on tooling. It fails on adoption.

THE MANDATE I'D BE TAKING, AND WHY IT MATCHES

Your first responsibility reads: *act as the primary driver to design, roll out and implement AI tools and frameworks that simplify, automate and accelerate daily workflows for the marketing team and the wider company, with a passion for driving tech adoption.*

That word — adoption — is the whole job, and it is the part most marketing candidates cannot evidence.

I have run the adoption problem in public for two years. @aieasyjob is a Cantonese-language channel built on one premise: take a capable professional who has already decided AI is not for them, and get them to the point where they try it tonight. Fifty-eight films, solo, from concept to final cut. What that teaches you is not the tools — it is precisely where a competent adult stops. Almost never at the tool. Nearly always at the first decision that feels irreversible, or the moment nobody has told them what to do on Monday morning.

A rollout inside a marketing team has the same failure curve. People do not resist AI because they doubt it works. They resist because the first attempt costs them visible time and produces something worse than what they would have written themselves. The fix is not a training session. It is picking two or three tasks where the win is immediate and unambiguous, shipping a template that removes the blank page, and making the first success public inside the team.

And I have built the governance half, which is what makes a rollout survive contact with a regulated business. Reusable prompt templates with conditional logic, enforced QC checklists, naming and version control, and a documented approach to what may and may not be produced by a model and what always needs a human on it. In a retail lending and card environment, where every claim carries regulatory exposure, that governance layer is not optional and it is the part most enthusiasm-led AI projects skip.

Where I would be learning, stated plainly. I have not worked in retail banking. Card and lending product mechanics, the internal approval chain, and the specific advertising constraints that apply to an HKMA authorised institution are new to me — including the Code of Banking Practice and the disclosure requirements around credit product promotion. I would expect to be fluent in the constraint set within weeks and useful on product economics within a quarter. I would rather name that now than have it surface in month two.

CORE COMPETENCIES

AI workflow design & adoption — Prompt architecture with conditional logic · chained multi-step workflows · custom skills for research, briefing and structural editing · QC checklists and human-in-the-loop gates · reusable templates published for others to run · naming and version control at volume · teaching and enablement for non-technical users

Digital campaign management — End-to-end campaign design, planning and execution · Meta Ads · Google Ads (Search, Shopping, Performance Max) · TikTok · budget allocation and pacing · delivery monitoring · KPI tracking and ROI optimisation

Performance analysis — ROAS, CAC, CTR, CVR, CPA, repeat purchase rate · structured single-variable A/B testing · post-campaign analysis and iteration · GA4, UTM and pixel governance · dashboard build and monthly senior-stakeholder reporting

Content oversight & creation — Copywriting and editing across long-form video, short-form, carousel, email, blog and landing page · **Facebook, Instagram and blog content in both Traditional Chinese and English** · brand voice definition and enforcement at volume · editorial calendar and production systems

MarTech & AdTech — Meta and Google ad ecosystems · Klaviyo lifecycle automation (30,000 subscribers) · Shopify · GA4 · Notion · AI-assisted competitor and trend monitoring feeding the next campaign cycle

Search & ecosystem — SEO and paid-social integration · SEM · content-led demand capture · e-commerce platform marketing

Cross-functional — Product, design, development, operations and merchandising · 200+ external creator partners with briefing standards and output quality control

SELECTED RESULTS

Introduced generative AI into commercial production in 2022 — and made it stick

Roughly two years before industry-wide adoption. Cut A/B testing cycles by 50% and materially reduced production cost at Hong Kong's #1 baby e-commerce platform. The durable part was not the tool choice: it was building templates and checklists other people could run, so the gain did not depend on me being in the room.

Built an AI production pipeline that sustains a team's output as one person

Reusable prompt templates with conditional logic and QC checklists, automated competitor and trend monitoring, automated carousel generation, enforced naming and version control. Cuts scripting time roughly 60% and enables same-day concept-to-publish. Fifty-eight films produced solo, eight of them in the last month.

Owned HK\$500K+/month at 3–7x ROAS, reported to senior stakeholders

Baby Central — led performance across Meta and Google (Search, Shopping, Performance Max, retargeting) through a high-growth scaling phase across HK and SEA. **HK\$300K incremental GMV in five months** and **30% organic traffic growth** through integrated SEO and paid social. Built the GA4 and Meta Ads Manager dashboards that tied spend to revenue rather than engagement proxies.

+200% conversion rate through disciplined creative testing

Raised output to **10+ variants per testing cycle** using AI-assisted production while holding **single-variable discipline** — hook, then message, then format — so every result stayed attributable to one change. Peak campaigns at 10x+ ROAS; cycle time cut roughly 50%.

Rebuilt a failing account: ROAS 0.3x → 3x in 90 days

A fashion and lifestyle retailer with budget trapped in warm retargeting. Rebuilt the funnel, moved **70% of spend into cold-audience acquisition**, and tested to isolate which messages — not which audiences — were failing. 3x on a majority-acquisition split: net-new customers, not harvested demand.

Content and social ownership across three platforms

Full ownership of YouTube, Instagram and Facebook as a solo operator — planning, copywriting, production, publishing, community replies and analytics. One Facebook Reel reached **76,000 organic views from a page with 77 followers**, no paid support; a second, built the same way, reached 11,000. That is writing craft with no audience and no media budget behind it.

HK\$3M+ across 20+ brands, and a 30,000-subscriber lifecycle programme

Cumulative spend across retail, lifestyle and F&B at consistent 3–7x ROAS. Owned the Klaviyo content-to-conversion system at Baby Central — twice-weekly campaigns plus automated welcome, abandoned cart, post-purchase and win-back flows.

HOW I'D RUN THE AI MANDATE — FIRST 90 DAYS

Audit the work before proposing the tools. The first deliverable is not a tool recommendation. It is a map of where the marketing team's hours actually go — which tasks are repetitive, which are blocked waiting on someone else, and which produce output nobody reads. AI applied to a task that shouldn't exist just produces waste faster.

Pick two or three wins that are immediate and unarguable. Adoption is won on the first attempt, not the tenth. I would start where the current process is visibly painful and the quality bar is objective — first-draft copy variants, competitor and market monitoring, brief and deck drafting, report summarisation — and deliberately avoid anything where a bad output is embarrassing before the workflow is proven.

Ship templates, not encouragement. A blank prompt box is the single biggest reason rollouts stall. What actually moves a team is a library of task-specific templates with the decision logic written in, so a colleague's first attempt

succeeds without them having to learn prompt craft first.

Build the governance gate at the same time as the capability. In a regulated lending and card business, what a model may draft, what always requires human review, what may never be model-generated, and where the audit trail lives all have to be settled before volume — not after an incident. I would want a named reviewer, an agreed turnaround, and a pre-approved claims library so testing velocity is limited by ideas rather than by sign-off.

Measure the rollout like a campaign. Hours returned, cycle time, variants tested per period, and actual usage rates by team member. If adoption is not measured it silently reverts, and "we rolled out AI" becomes a statement nobody can defend six months later.

Then compound it outward. The mandate covers the wider company, not just marketing. Once marketing has a working pattern and a governance model that has survived scrutiny, that becomes the reference implementation other teams copy — which is a far cheaper route to company-wide adoption than starting fresh in each function.

PROFESSIONAL EXPERIENCE

Founder & Digital Marketing Operator — @aieasyjob (YouTube · Instagram · Facebook)

2024 – Present | Hong Kong

- Built a Cantonese-language brand from zero as a solo operator with full ownership of strategy, copy, production, distribution and analytics — 58 films to date, eight in the last month.
- Produced a **76,000-view organic Facebook Reel from a 77-follower page**, zero paid support; a second at 11,000 confirmed the result was structural.
- Engineered an AI production pipeline (Claude, ChatGPT, Gemini, Midjourney, Ideogram) with reusable templates, conditional logic and enforced QC — cutting production time ~60%.
- Ran hypothesis-driven tests on messaging, format and opening structure against native retention data, compounding findings into a documented playbook.
- Built and published task templates other people run — the practical test of whether an AI workflow is a system or a personal habit.
- Converted organic audience into B2B consulting engagements at HK\$13,800/month packages.

Freelance Digital Marketing Consultant

Mar 2024 – Present | Hong Kong & Regional Clients

- Rebuilt full-funnel Meta strategy for a fashion and lifestyle retailer — **0.3x to 3x ROAS in 90 days** on a 70% cold-acquisition split.
- Delivered **+200% conversion rate** through structured single-variable A/B testing at 10+ variants per cycle; peak campaigns at 10x+ ROAS.
- Managed monthly Shopify DTC budgets of HK\$30K–200K per client at consistent 3–7x ROAS.
- Built Klaviyo lifecycle flows and deployed segmented personas with three-stage funnel messaging, cutting testing cycles 50%.

B2C E-Commerce & Digital Marketing Manager

Baby Central Limited (Hong Kong's #1 baby e-commerce platform) / Bloom and Grow Limited

Jan 2022 – Feb 2024 | Hong Kong & SEA

- Owned **HK\$500K+/month** Meta and Google spend at consistent **3–7x ROAS** across HK and SEA during a high-growth scaling phase.
- Drove **HK\$300K incremental GMV within five months**; grew organic traffic **30%** through integrated SEO and paid social.
- Built and scaled a **200+ KOL and influencer programme** across HK and SEA, including briefing standards and output quality control.
- Owned the **Klaviyo content-to-conversion system for 30,000 subscribers**.
- Built **GA4 and Meta Ads Manager dashboards** for monthly senior-stakeholder reporting.
- **Pioneered generative AI in the creative and campaign workflow in 2022** — A/B cycles cut 50%, roughly two years ahead of industry adoption.
- Worked cross-functionally with product, design, development, operations and merchandising to ship on commercial deadlines.

Freelance Digital Marketing Manager — 20+ Retail / Lifestyle / F&B Clients

Nov 2018 – Dec 2021 | Hong Kong

- Managed **HK\$3M+ cumulative ad spend** at consistent 3–7x ROAS, rebuilding funnel architecture and messaging per brand and per sales cycle.

Product Marketing Executive — Mayborn Ltd (Tommee Tippee)

May 2018 – Nov 2018 | Hong Kong

- Grew social engagement **15%** through 30+ micro-influencer partnerships generating 3,000+ engagements; contributed to a **5x increase** in organic traffic.

AI & MARTECH STACK

Reasoning and production: Claude (daily — custom skills, chained workflows, structural editing, briefing, competitor teardowns) · ChatGPT · Gemini · Perplexity

Image and video: Midjourney · Ideogram · ChatGPT Image · Nano Banana · Seedance · CapCut · Canva

Advertising and analytics: Meta Ads Manager · Google Ads (Search, Shopping, Performance Max) · TikTok · GA4 · Klaviyo · Shopify · Notion

Office and collaboration: Microsoft Word, Excel, PowerPoint · Google Workspace · Notion

CERTIFICATIONS

- **Executive Certificate in Growth Hacking & Data-Informed Marketing — The University of Hong Kong (2019)**
- Advanced Course for Generative AI in Digital Marketing — YMCA College (Dec 2024)
- All-in-One Full-Stack Marketing, No-Code & AI Agent Course (2025 – Present)

EDUCATION

Bachelor of Arts, Travel and Tourism Management — Northumbria University, UK (2005)

Associate Degree, Leisure and Tourism Management — City University of Hong Kong (2004)

AVAILABILITY & PACKAGE

Current: HK\$40,600 per month — self-employed consulting income. Gross, and excluding employer MPF contribution, paid annual leave and medical coverage, so not directly comparable to a permanent package.

Expected: HK\$50,000 – 55,000 per month base, excluding bonus. This sits at the Morgan McKinley Hong Kong 2026 reference point of HK\$55,000 for a Digital Marketing Manager, and reflects a move from self-employed consulting into a permanent position. Flexible depending on how the role is levelled and the total package — happy to anchor to your budgeted band rather than guess.

Availability: 2 weeks from agreed terms.

Location: Hong Kong, available on-site.
