## Creative Strategist — Performance & Growth

+852 9298 1110 | ai@digitalanson.com | digitalanson.com | youtube.com/@aieasyjob | IG @aieasyjob | FB: AI 係咁易

### PROFESSIONAL SUMMARY

Performance-driven Creative Strategist with 7+ years converting creative testing into measurable revenue for consumer and DTC brands in Hong Kong and Southeast Asia. HK\$3M+ cumulative paid spend managed at 3–10x ROAS, including HK\$500K+/month at Hong Kong's #1 baby e-commerce platform during a high-growth scaling phase, with HK\$300K incremental GMV delivered in 5 months.

Builds structured creative testing roadmaps rather than running ad-hoc tests: 70/30 proven-versus-test budget allocation, single-variable sequencing (hook → messaging → format) so every result is attributable, and a metric ladder read down the funnel — thumb-stop rate and hook rate through CTR, CVR, CPA to ROAS. Creative that wins on engagement but fails downstream gets retired, not scaled.

Scales winners with AI-accelerated variant production at 10+ creatives per cycle, delivering +200% conversion rate and cutting testing cycle time ~50%. Owned-channel results validate the method independently of budget: a **76,000-view organic Facebook Reel from a 77-follower page** — roughly 990x follower count and 210x channel median — with zero paid support.

Data-first operating habits: GA4 and Meta Ads Manager dashboards, UTM and pixel governance, monthly performance reporting to senior stakeholders. Trilingual: Cantonese (native), English (fluent), Mandarin (fluent).

### PERFORMANCE HIGHLIGHTS

| Metric                      | Result                                                   |
|-----------------------------|----------------------------------------------------------|
| Cumulative ad spend managed | HK\$3M+ at 3–10x ROAS                                    |
| Peak monthly spend owned    | HK\$500K+/month at consistent 3–7x ROAS                  |
| Creative A/B testing uplift | +200% conversion rate; peak ROAS 10x+                    |
| Paid turnaround             | ROAS 0.3x → 3x in 90 days (fashion retail)               |
| Revenue attribution         | HK\$300K incremental GMV in 5 months (Shopify DTC)       |
| Testing velocity            | 10+ AI-generated variants per cycle; cycle time cut ~50% |
| Organic creative outlier    | 76,000-view Reel — ~210x channel median, ~990x followers |
| Lifecycle scale             | Klaviyo programme, 30,000 subscribers, 2x weekly         |
| UGC / creator scale         | 200+ KOL & influencer partnerships across HK & SEA       |
| Organic traffic growth      | +30% via integrated SEO and paid social                  |

### CREATIVE TESTING METHODOLOGY

**Budget architecture.** 70/30 split between proven creative and active tests — enough allocation to learn meaningfully without putting account performance at risk.

**Single-variable sequencing.** Hook first, then messaging angle, then format. One variable per test, so results are attributable rather than directional. Higher AI-driven throughput is held inside this discipline; volume without attribution is noise.

**Metric ladder.** Thumb-stop rate and hook rate → CTR → CVR → CPA → ROAS. Every creative decision is read at the level where it actually affects revenue, not at the level that flatters the creative.

**Winner scaling and documentation.** Winners are written into a creative playbook with the structural reason they won — hook mechanic, tension placement, payoff timing — so patterns compound across accounts instead of being re-derived each cycle.

**Measurement infrastructure.** GA4 and Meta Ads Manager dashboards, UTM taxonomy and pixel governance maintained as a precondition of testing, not an afterthought — monthly reporting to senior stakeholders built on the same source of truth.

**Research loop.** AI-assisted outlier detection across YouTube and Instagram plus platform-change monitoring, feeding the next cycle's test hypotheses directly.

## SIGNATURE CASE STUDIES

### 1. Paid Creative Turnaround — ROAS 0.3x to 3x in 90 Days

**Context.** A fashion and lifestyle retail client was running Meta Ads at 0.3x ROAS. Budget was concentrated in warm retargeting, and the creative pool had gone stale — the account was harvesting existing demand at a loss.

**Action.** Diagnosed the failure as creative, not audience, and ran single-variable tests to isolate which hooks were breaking. Rebuilt the full-funnel creative strategy from scratch and reallocated **70% of budget to cold-audience prospecting** for net-new acquisition, rebuilding the creative pool around journey-stage messaging instead of a single offer angle.

**Result.** ROAS scaled from **0.3x to 3x within 90 days** on a majority-prospecting split — a materially harder result than a retargeting-led lift, because the gain came from net-new customers rather than existing demand.

### 2. Revenue-Attributed Creative at Scale — HK\$300K Incremental GMV in 5 Months

**Context.** Baby Central, Hong Kong's #1 baby e-commerce platform, scaling across HK and SEA. Trust-sensitive category: creative credibility directly gates conversion, and vanity engagement metrics are actively misleading.

**Action.** Owned creative direction and performance for HK\$500K+/month across Meta and Google (Search, Shopping, Performance Max, retargeting). Built GA4 and Meta Ads Manager dashboards specifically to tie creative decisions to revenue rather than engagement proxies, and scaled a 200+ KOL programme as a measurable UGC engine rather than a brand-awareness line item.

**Result.** **HK\$300K incremental GMV within 5 months**, consistent 3–7x ROAS on HK\$500K+/month spend, and 30% organic traffic growth through integrated SEO and paid social.

### 3. Testing Throughput — +200% Conversion Rate at 10+ Variants Per Cycle

**Context.** Client creative testing was throughput-limited to a handful of variants per cycle, producing slow, low-confidence learning and long stretches running unvalidated creative.

**Action.** Built an AI-assisted variant production pipeline (Claude, ChatGPT for copy and angles; Midjourney, Ideogram for visuals) raising output to 10+ variants per cycle — while holding single-variable discipline so throughput did not destroy attribution.

**Result.** **+200% conversion rate** across Meta Ads and Instagram, peak campaigns at **10x+ ROAS**, and testing cycle time cut ~50%, compounding learning velocity across the account.

### 4. Organic Creative Outlier — Method Validated Without Budget

**Context.** @aieasyjob's Facebook page: 77 followers, channel median around 360 views per Reel. No paid amplification and no distribution advantage — the hardest possible test of whether creative structure alone can earn reach.

**Action.** Applied the same hook discipline used on paid accounts — first-frame pattern-interrupt, tension-led opening beat, payoff timed against observed drop-off — iterating weekly against native retention and thumb-stop data.

**Result.** **76,000 organic views on a single Reel — ~210x channel median, ~990x follower count, zero ad spend.** A second Reel at 11,000 views confirmed the result was structural rather than incidental. Independent evidence that the performance gains above come from creative method, not media budget.

## OWNED CHANNEL DATA (VERIFIED, JULY 2026)

| Channel              | Metric                                           | Result                                       |
|----------------------|--------------------------------------------------|----------------------------------------------|
| Facebook (AI 係咁易)    | Top Reel, organic (77-follower base)             | 76,000 views — ~210x median, ~990x followers |
| Facebook             | Second Reel above 10K                            | 11,000 views                                 |
| YouTube (@aieasyjob) | Cumulative views / videos                        | 84,000+ / 57                                 |
| YouTube              | Views added / videos published, trailing 30 days | 6,700+ / 7                                   |
| All channels         | Paid amplification                               | None — fully organic                         |

## CORE COMPETENCIES

---

### Creative Testing & Performance Analysis

Structured testing roadmaps (70/30 proven-vs-test) · Single-variable sequencing · ROAS, CTR, CVR, CPA · Hook rate, thumb-stop rate, retention curves · Creative playbooks & winner scaling · Incrementality thinking · Monthly stakeholder reporting

### Paid Media

Meta Ads (prospecting + retargeting) · Google Ads (Search, Shopping, Performance Max) · TikTok · Budget allocation & pacing · Cold-audience acquisition strategy

### Measurement Infrastructure

GA4 dashboards · Meta Ads Manager reporting · UTM taxonomy & pixel governance · Attribution hygiene · Shopify DTC analytics

### Creative Strategy & Production

Creative concept development · Hook & thumb-stop design · Copywriting, scripting & briefs · AI-accelerated variant production · Asset naming, tagging & version control · Multi-platform repurposing

### Audience, UGC & Lifecycle

Customer personas & journey-stage creative · UGC frameworks & creator briefing · 200+ KOL programme design · Klaviyo lifecycle (30,000 subscribers) · CRO & landing page messaging

## PROFESSIONAL EXPERIENCE

---

### Freelance Digital Marketing Consultant

*Mar 2024 – Present | Hong Kong & Regional Clients, Remote (APAC)*

- Rebuilt full-funnel Meta Ads strategy for a fashion and lifestyle retailer — ROAS 0.3x to 3x within 90 days, with 70% of budget on cold-audience prospecting for net-new acquisition.
- Ran systematic creative A/B testing with AI-generated variants (10+ per cycle) under single-variable discipline — +200% conversion rate, 10x+ ROAS on peak campaigns.
- Managed monthly Shopify DTC budgets of HK\$30K–200K per client at consistent 3–7x ROAS across Meta Ads and Google Shopping.
- Built three-stage funnel architecture (Awareness / Consideration / Conversion) with AI-generated personas for a multi-regional hair care brand — testing cycles cut 50%.
- Built Klaviyo lifecycle flows — welcome, abandoned cart, post-purchase — driving measurable repeat purchase revenue.

### B2C E-Commerce & Digital Marketing Manager

**Baby Central Limited (HK's #1 baby e-commerce platform) / Bloom and Grow Limited**

*Jan 2022 – Feb 2024 | Hong Kong & SEA*

- Achieved consistent 3–7x ROAS on HK\$500K+/month Meta and Google spend (Search, Shopping, Performance Max, retargeting) across HK and SEA during a high-growth scaling phase.
- Drove HK\$300K incremental GMV within 5 months via data-driven Shopify campaign targeting — creative decisions tied directly to revenue.
- Built GA4 and Meta Ads Manager performance dashboards for monthly senior-stakeholder reporting; maintained UTM and pixel governance as testing infrastructure.
- Scaled a 200+ KOL and influencer programme across HK and SEA as a measurable UGC engine in a trust-sensitive category.
- Owned the Klaviyo content-to-conversion system for 30,000 subscribers — 2x weekly campaigns plus welcome, abandoned cart, post-purchase and win-back automation.
- Pioneered generative AI (ChatGPT, Ideogram) in creative production in 2022 — A/B testing cycles cut 50%, roughly two years before industry adoption.
- Grew organic site traffic 30% through integrated SEO and paid social; collaborated cross-functionally with design, development, operations and merchandising.

### Founder & Creative Operator — @aieasyjob (YouTube · Instagram · Facebook)

*2024 – Present | Hong Kong (Global Audience)*

- Operate a multi-platform content engine as a live creative testing lab — weekly hypothesis-driven tests on hooks, thumbnails and formats scored against retention and thumb-stop data.
- Produced a 76,000-view organic Facebook Reel from a 77-follower base (~990x follower count, ~210x channel median) plus a second Reel at 11,000 views, with zero paid support.
- Accumulated 84,000+ YouTube views across 57 videos, publishing 7 in the trailing 30 days as a solo operator.
- Proved content-to-revenue: B2B consulting leads at HK\$13,800/month packages sourced directly from organic content.

**Freelance Digital Marketing Manager — 20+ Retail / Lifestyle / F&B Clients**

*Nov 2018 – Dec 2021 | Hong Kong*

- Managed HK\$3M+ cumulative ad spend across 20+ clients with repeatable campaign frameworks at consistent 3–7x ROAS.
- Adapted creative strategy, targeting structure and funnel architecture to each brand's audience and sales cycle across simultaneous engagements.

**Product Marketing Executive — Mayborn Ltd (Tommee Tippee)**

*May 2018 – Nov 2018 | Hong Kong*

- Grew social engagement 15% through 30+ micro-influencer partnerships generating 3,000+ engagements; contributed to 5x organic traffic growth.

**AI TOOLS & DAILY WORKFLOW**
